City Council,

I support the El Camino projects from Sylvan to Rengstorff.

I've been living downtown for 17 years and make daily bike trips to Palo Alto, Los Altos, or Sunnyvale. I try to patronize grocery stores, the hardware store, and restaurants on El Camino within a few miles from home without having to use a car.

I try to avoid El Camino by using California, Latham-Church, Marich Way, as well as cutting through parking lots. However, the offset cross streets between Mountain View and Los Altos make some riding on El Camino necessary.

I support this resolution. Class IV Bike Lanes are needed on El Camino. Yay!

I encourage council to be bold, to go beyond staff recommendation and build bike lanes all the way to San Antonio!

The 21 cars parked in 2018 should not be reason to "do it later". Doing it later will cost more! This CalTrans repaving is an excellent opportunity, and council was right to seize upon it. Don't fear the parked cars! They cannot hurt you.

For point #4: Can we send someone over to Los Altos to ask why they won't be protecting their bike lanes? Maybe we can buy them each a bicycle?

Also: Very strong support of item 7.1 - Mobile Home Rent Stabilization - A much needed change

thank you

- Isaac Stone
