BACKGROUND

Over the past 25 years, the Building Inspection Division has provided Structural, Fire, and Building Code services through contracts with consulting firms that specialize in these areas. Contracting with these professional firms allows the Building Inspection Division the flexibility to respond and manage the development workload as it fluctuates. These firms have been necessary to maintain quick turnaround times for plan checking and inspection services that are required under State law and provide a customer service level that is expected by the City's businesses and developers. The Building Inspection Division has continued to use these firms because they are familiar with the City's processes and procedures and have been very efficient in maintaining turnaround times.
