6.1 Grant Road and Sleeper Avenue Intersection Improvements, Project 21-39

1. Question: I recall some number of other intersections were getting attached to this project for various potential safety upgrades? What is the status of those/are they still connected to this project?

Answer: There are a total of ten intersections included in the overall project, and are listed below in no particular order:

1. Grant Road and Sleeper Ave
2. East Middlefield Road and Tyrella Avenue
3. West Middlefield Road and Terra Bella Avenue
4. Middlefield Road and San Pierre Way
5. Rengstorff Avenue and Junction Avenue
6. Cuesta Drive and Bonita Avenue
7. Cuesta Drive and Begen Avenue
8. Heatherstone Way/Dale Avenue at the Steven's Creek Trail Entrance
9. Sleeper Avenue and Franklin Avenue
10. East Dana Street and Pioneer Way

Design is actively advancing for all ten intersections as part of this project. Grant Road and Sleeper Avenue is the most complicated intersection which justified a feasibility study prior to design. The preferred alternative concept from the feasibility study was previously recommended by BPAC and CTC, and approved by Council with direction to return to CTC with an additional design element (the northern bicycle crossing). The planned improvements for the other nine intersection will add standard safety crossing enhancements that have been applied at other intersections within the City, such as high visibility crosswalks, flashing beacon systems, and other signage to increase visibility.
