Brothers Services Tree Care, c/o Angel  
1336 Hancock St  
Redwood City, CA 94063

Site: 2424 Whitney Dr, Mountain View

Dear Angel

At your request I visited the above site for the purpose of inspecting and commenting on a Victorian box at the front of the property. The tree appears to be in very poor health and condition, prompting the need for this report.

The tree can be seen in the attached photos.

Victorian box, *Pittosporum undulatum*  
Diameter at standard height: 16.2"  
Height: 35 feet estimated  
Canopy spread: 20 x 20 feet estimated

The tree is in very poor health and condition. The canopy is thin and full of dead wood. The canopy has been topped at 28' and resprouted new growth from the topping cut. The tree has poor structure at 20' where there is included bark at a main scaffold branch union. There is a cavity at 8' above grade on the trunk of the tree from where a limb has previously been removed. There is decay and a cavity at the base of the tree, and signs of oak root fungus around the entire root crown.

The tree is in very poor health and condition and should be removed.

If you have any questions, please don't hesitate to call.

Sincerely

Robert Weatherill  
Certified Arborist WE 1936A
