I strongly support the continuation and expansion of the Safe Parking program. This has been a successful way to provide affordable housing for people who live in our community and can't afford our astronomic rents. Perhaps in the future we will find a way to house low income folks in other ways, such as mini houses build on city owned land that is not being used.

In the meantime RV's are the only option for low income residents, so we need to continue and expand this program.

Thank you for you consideration of my request

Best,
David
