Hi, I am a 10 year resident of Mountain View. I have lived on San Pablo Ave. for over 8 years. Tonight I advocate that a tunnel or some other connector be built connecting Terra Bella to Stevens Creek trail. As more housing is built in this area, and as the density increases, while at the same time walkability and isolation is very high in this aging industrial area, it is imperative there is access to Stevens Creek trail for current and future residents. As a though, I believe it would be possible to build a tunnel just under CA-85 and then have an above ground trail going under the fly-overs to 101. Thank you.
