

## CURRENT WATER USE RESTRICTIONS

### Permanent Water Use Prohibitions

1. Using hoses without an automatic shut-off device for washing automobiles or other vehicles, driveways, patios, or sidewalks.
2. Wasting potable water by allowing it to run off into gutters, sidewalks, streets, or other hard-surfaced areas.
3. Serving water in restaurants, except on request.
4. Wasting water because of broken or defective plumbing, sprinklers, watering, or irrigation systems.
5. Installing single-pass cooling systems on new construction.

### Stage 2 Water Use Prohibitions

1. Wasting water from broken or defective water systems (must be repaired within five days).
2. Washing paved or hard surfaces, except by bucket or for health and safety reasons
3. At-home vehicle washing, except by bucket.
4. Watering or irrigating landscapes:
  - Between 9:00 a.m. and 5:00 p.m. (except by bucket, hose, or for system repair).
  - More than three days per week (for each irrigation station).
  - More than 15 minutes per day (except for drip irrigation or for system repair).
  - During or within 48 hours following rain events.\*
5. Using potable water in decorative water features, except to sustain aquatic life (provided the water is recirculated).
6. Using nonwater-conserving dishwashing spray valves in restaurants.

---

\* 48-hour limit is per State mandate not City Code.

7. Providing new linens to hotel guests without offering reuse options.
8. Constructing or installing and operating new commercial car washes and commercial laundry systems that do not use water-recirculating technologies.
9. Using potable water for construction needs when recycled water is readily available.

## **CURRENT WATER CONSERVATION PROGRAMS**

### **Free Devices and Programs**

- Showerheads, shower timer, toilet flappers, faucet aerators, toilet leak-detection tablets, toilets (for businesses and apartments).
- Water-wise house calls, landscape surveys, and landscape water budget reports.
- Landscape education classes.
- School presentations.

### **Rebates for Water-Efficient Equipment and Landscaping**

- Clothes washers, toilets, urinals, graywater laundry-to-landscape systems, low-water-use plants, irrigation equipment, submeters, connectionless food steamers, air-cooled ice machines, and any commercial equipment or process change that saves water.
