## **METHODOLOGY**

Data unrelated to the CoStar databases was obtained by staff through use of internal record keeping and in partnership with external consultants and vendors, including Associated Right of Way Services (ARWS) and the Mountain View Housing Helpline. Data gathered from CoStar utilizes as regimented and consistent search terms within the database as possible in an effort to adhere to the specifics of the CSFRA.

The data provided by CoStar and used in the CSFRA Monthly Report was obtained as follows:

- **Vacancy Rate Data (Units Built Before 1995):** The search criteria for Vacancy Rate Data included multi-family properties with three or more units built before 1995 within Mountain View using the *Properties* database.
- **Average Effective Rent Data:** The search criteria for Average Effect Rent Data included multi-family properties with three or more units built before 1995; multi-family properties with three or more units built from 1995 through 2016; and multi-family properties with three or more units after 2016 using the *Properties* database. These three data points illustrate the effective rent trends for the total market, including units fully covered by the CSFRA (built before 1995), units partially covered by the CSFRA (built from 1995 through 2016), and units not covered by the CSFRA (built after 2016) within Mountain View.
- **Multi-Family Property Sales for Units Built Before 1995:** The search criteria for Multi-Family Property Sales for Units Built Before 1995 included multi-family apartment properties with three or more units that sold from 2008 through 2018 within Mountain View using the *Sales Comp* database. Non-Arm's Length Sales, in which there is a relationship between the buyer and the seller of the property, were excluded.
- **Properties Currently for Sale:** The search criteria for Properties Currently for Sale included multi-family apartment properties with three or more units currently for sale with Mountain View using the For Sale database.
