Downtown Parking Technology

1. Develop a website application for online permitting system to allow permit holders to purchase and manage their permits online, along with the ability to print daily permits from a personal computer.
2. Develop and issue a Request for Proposals for a real-time wayfinding sign program at the two parking structures. Each sign would display two types of information - total available occupancy and directions to another parking garage. The program would also include an online website showing parking availability.
3. Develop and implement a work plan to utilize vehicle-detection parking technology for parking enforcement efforts.
