Introduction

The Rengstorff Avenue Complete Streets Study (Project) aims to enhance safety and access for biking, walking, driving and other active modes of transportation along Rengstorff Avenue between Leghorn Street to the north and El Camino Real to the south, as shown in **Figure 1**.

Figure 1: Study Area Map

Throughout the Project corridor, there are opportunities to enhance multi-modal connections and provide green street elements, while also focusing on improving safety for vulnerable road users, including pedestrians, bicyclists, children and seniors. The Project team conducted outreach in February and March of 2026 to understand the community's challenges along the corridors and ideas for improvements. This outreach round consisted of the following engagement activities:

- Community Walk and Bike Event (February 27, 2026): a guided walk along Rengstorff Avenue with project stakeholders, local community members, and school communities
- Online Survey (open online from February 1 to March 2, 2026), which consisted of:
 - A questionnaire
 - A PublicCoordinate Interactive Map

This document summarizes the findings from the first round of public outreach.

Engagement Activities

Engagement Materials

Promotional materials were developed and distributed to increase awareness of Round 1 engagement activities. The community was informed about the engagement activities through the following ways:

- Email notifications to current Mountain View residents
- Yard signs placed around the Community Center and parks along Rengstorff Avenue
- Postcards mailed along the corridor
- Fliers with information on the project

Mountain View's local nonprofit newspaper, *Mountain View Voice*, also published an article in March that highlighted the Round 1 outreach activities and next steps for the project. A link to the article is included below.

Round 1 engagement materials can be found in **Appendix A**.

Community Walk and Bike Event

To better assess existing issues and potential improvements along Rengstorff Avenue, a community walk and bike event was conducted on February 27, 2026 with City staff, project stakeholders, and 12 local community members.

The corridor was broken into two routes, which participants either walked or biked. A Southern Route tour started at the Mountain View Community Center, going south along Rengstorff Avenue to El Camino Real, before returning to the Community Center. The Northern Route tour went from the Mountain View Community Center north to W Middlefield Road (bikers) or to Jane Lane (walkers) and back to the Community Center. Participants were prompted with discussion questions to help solicit focused feedback on the corridor at various locations. Additionally, participants were able leave pins with comments on PublicCoordinate for any observations they had while traversing the corridor. Feedback from this event was recorded through pins in a separate PublicCoordinate map, the results of which were combined with the rest of the feedback heard through PublicCoordinate, and summarized in the following section. See **Appendix B** for the Community Walk and Bike Event handout and individual PublicCoordinate comments.

Online Survey

An online survey was developed and hosted on the PublicCoordinate platform, a webmap tool that allows respondents to input location-specific feedback on an interactive map. Additionally, a traditional question-based survey created through CVENT was embedded on the PublicCoordinate platform to solicit mobility preferences and challenges as well as demographic information.

PublicCoordinate Map

The interactive map tool allowed respondents to place pins on a map of the Project focus area to provide location-specific feedback. Seven types of pin categories were provided: idea, biking challenge, walking challenge, driving challenge, transit challenge, accessibility challenge and other challenge. Each pin type provided an open-response text box to leave a comment. All pins were publicly visible, and viewers of the site could upvote and respond to others' comments if they agreed with the content. The interactive map received 240 total pins, with these pins receiving a combined 428 upvotes. A copy of the PublicCoordinate map responses is included in **Appendix C**.

Screenshot of PublicCoordinate Interface

Figure 2 shows the breakdown of the PublicCoordinate comments by pin type. Biking challenges were the most common category (34%), followed by driving challenges (26%) and walking challenges (26%).

Figure 2: PublicCoordinate Comments by Pin Type

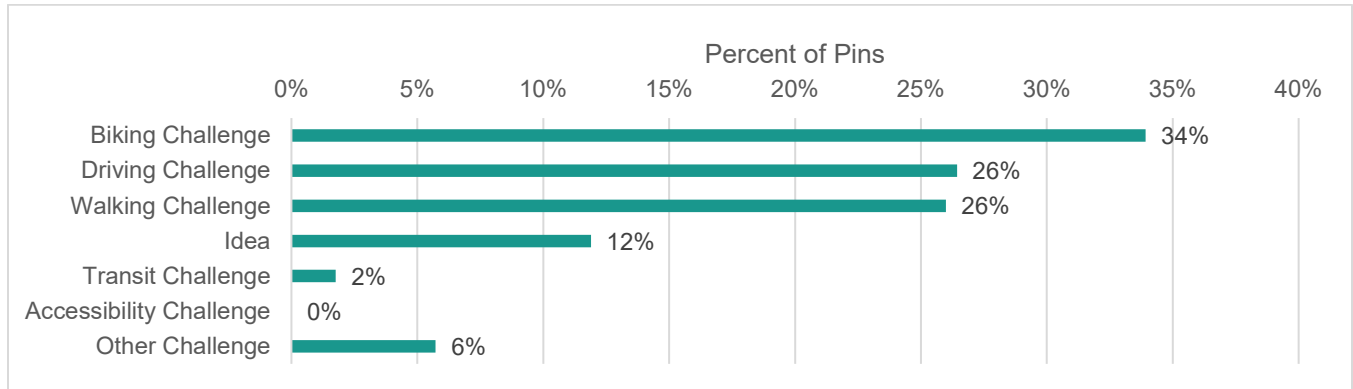

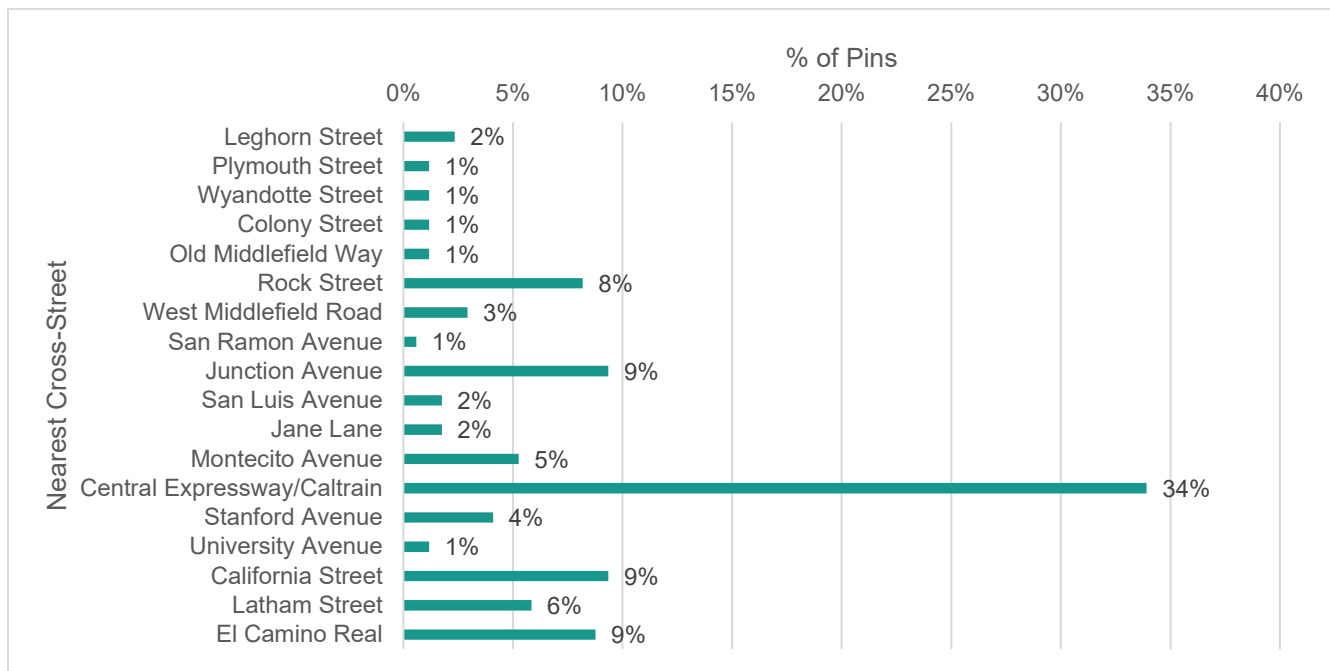

Figure 3 shows the breakdown of PublicCoordinate comments by nearest cross-street (with cross-streets listed north to south). Over 33 percent of comments were concentrated around the Central Expressway and the Caltrain crossing. Rock Street, Junction Avenue, California Street and El Camino Real were other high-comment areas.

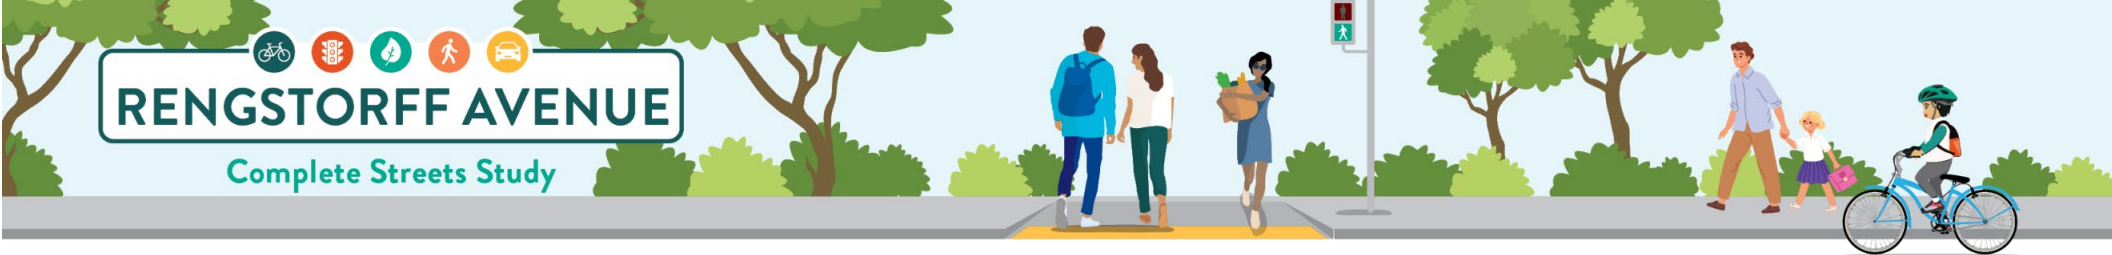

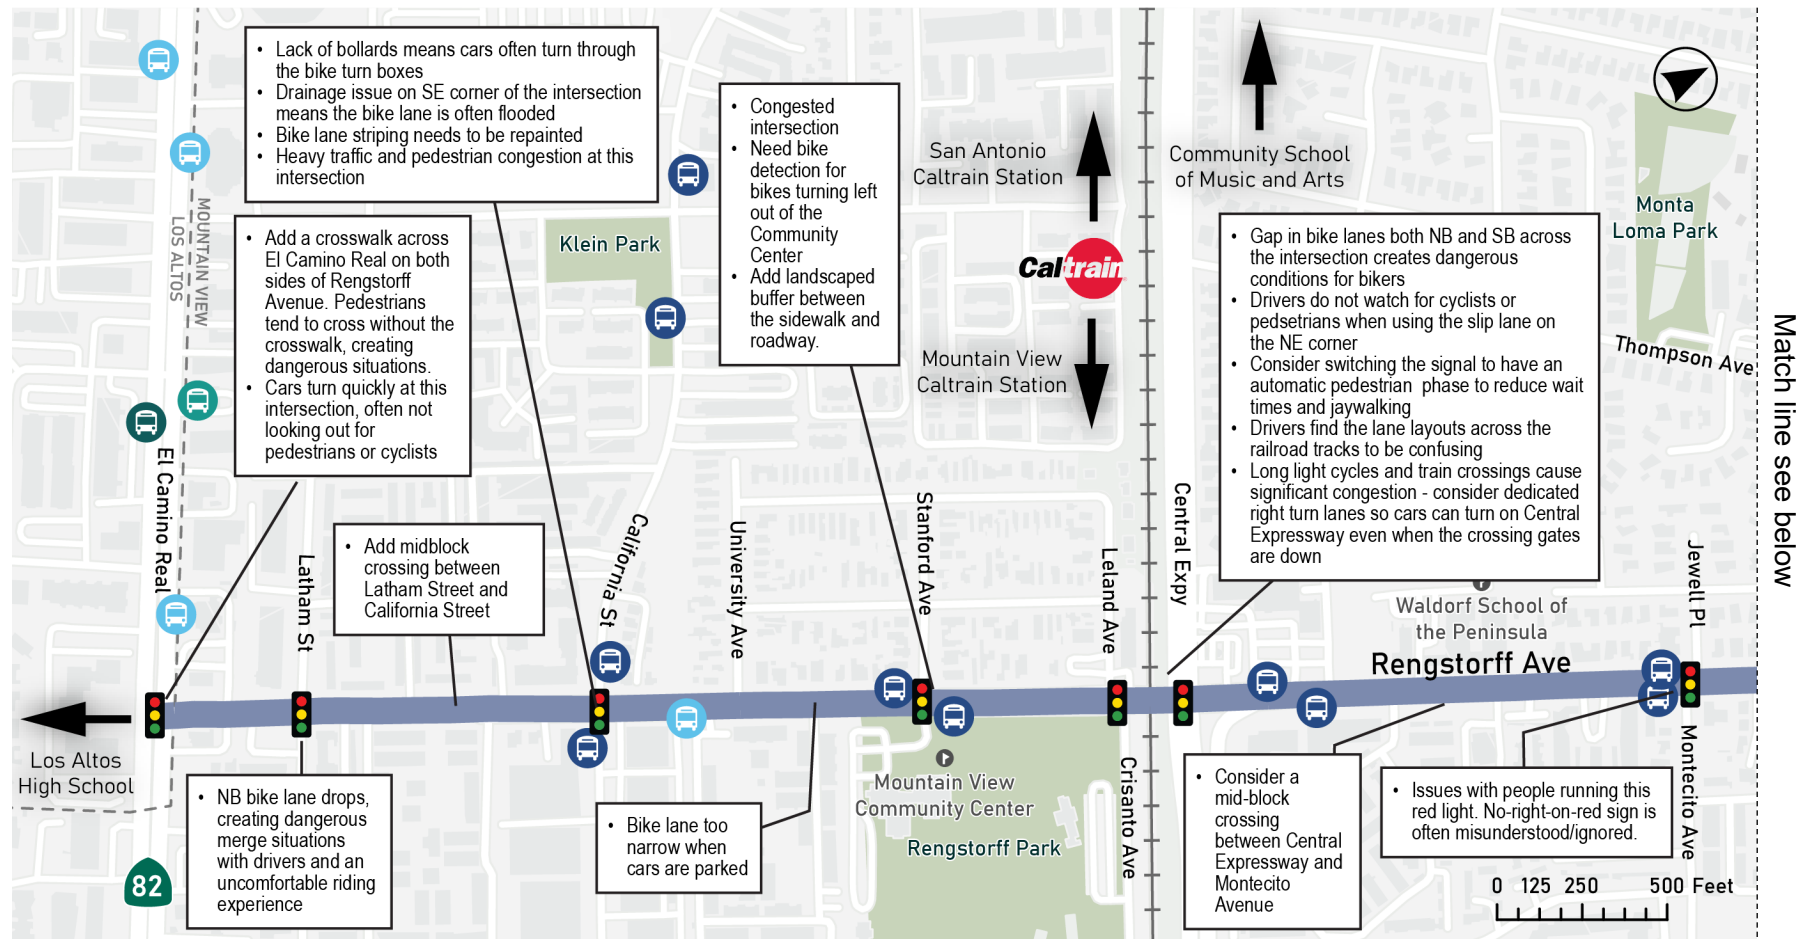

Figure 4 below summarizes the locations and contents of the pins on PublicCoordinate (including comments from both the survey and from the Community Walk and Bike Event).

Questionnaire

The online questionnaire contained eight questions asking about respondents' travel patterns and mobility challenges along Rengstorff Avenue. There were also 4 optional demographic questions. The questionnaire gathered 1,019 responses. A copy of the individual survey responses is included in **Appendix D**.

Q1: Which of the following best describes why you travel on Rengstorff Avenue?

Respondents were asked why they travel on Rengstorff Avenue. The results are shown in **Figure 5**. Most respondents reported living on or near Rengstorff Avenue (71%), and/or shopping, eating, and visiting entertainment and medical destinations along Rengstorff Avenue (59%). Just under a third of respondents (31%) use Rengstorff Avenue on their commute to work.

Figure 5: Which of the following best describes why you travel on Rengstorff Avenue? Select all that apply.

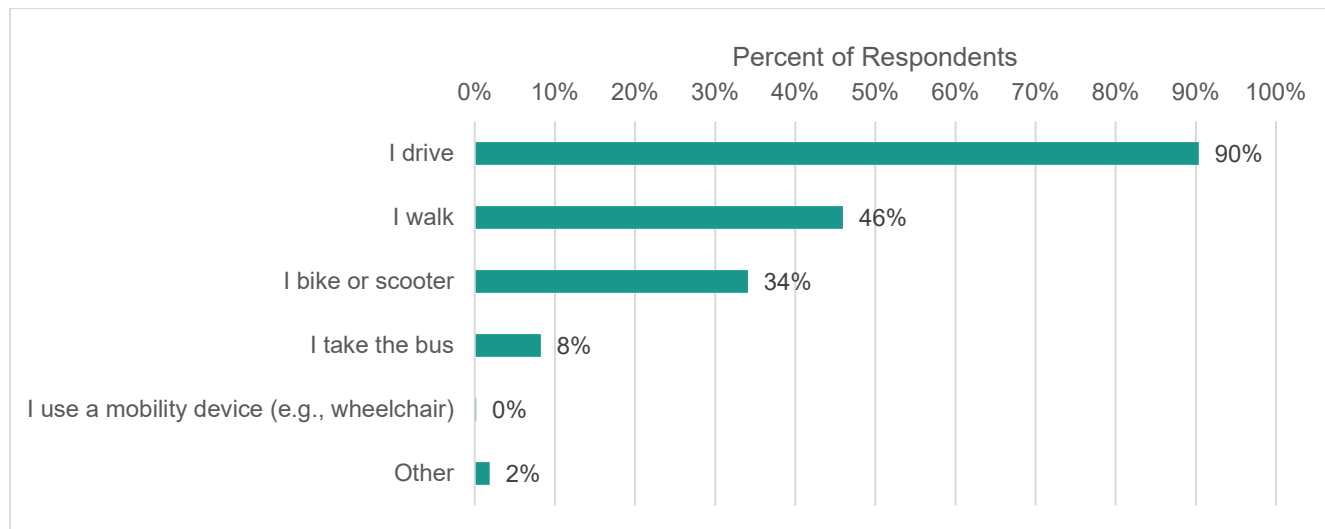

Q2: How do you travel on Rengstorff Avenue?

Respondents were asked how they travel on Rengstorff. The results are shown in **Figure 6**. A significant majority of respondents drive along Rengstorff Ave (90%). Walking (46%) and bike/scooter (34%) were the next most popular travel modes.

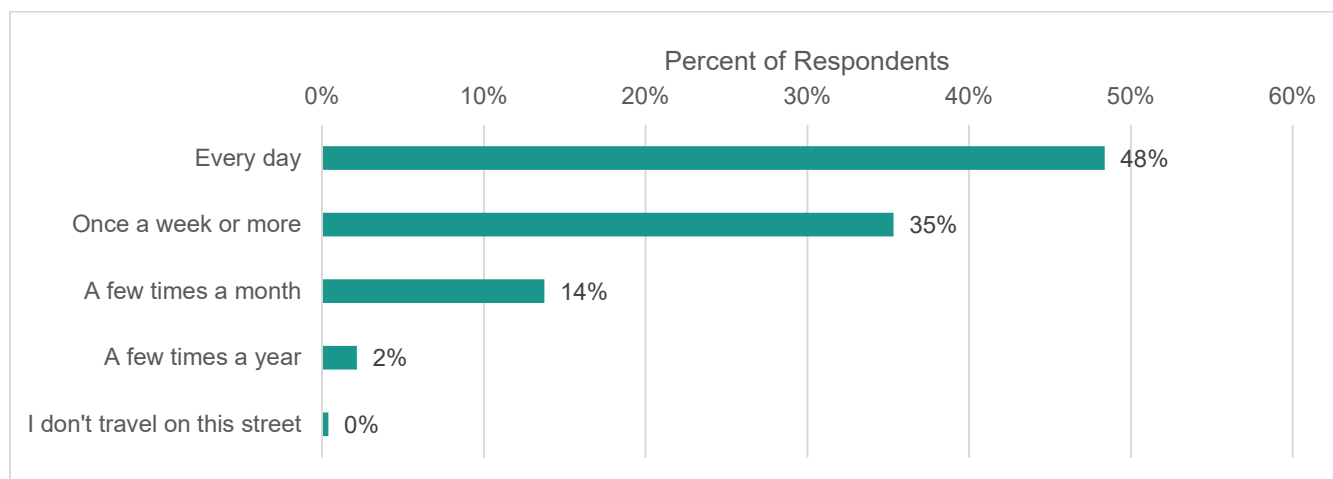

Figure 6: How do you travel on Rengstorff Avenue? Select all that apply.

Q3: How often do you travel on Rengstorff Avenue?

Respondents were asked how often they travel on Rengstorff Avenue. Results are shown in **Figure 7**. Most respondents use Rengstorff Avenue either daily (48%) or weekly (35%).

Figure 7: How often do you travel on Rengstorff Avenue? Select one.

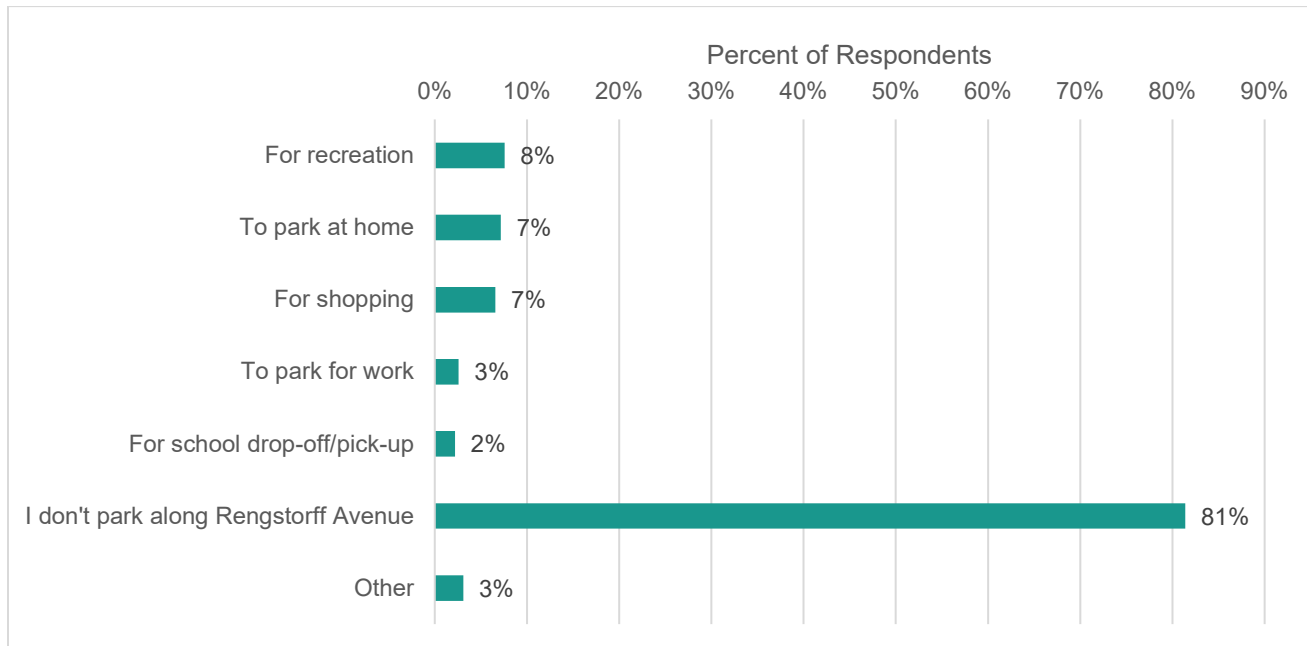

Q4: Why do you use on-street parking along Rengstorff Avenue?

This question sought to understand why respondents park along Rengstorff Avenue. As shown in **Figure 8**, most respondents do not park along Rengstorff Avenue. For those who did, recreation (8%), parking at home (7%), and shopping (7%) were the most popular reasons.

Figure 8: Why do you use on-street parking along Rengstorff Avenue? Select all that apply.

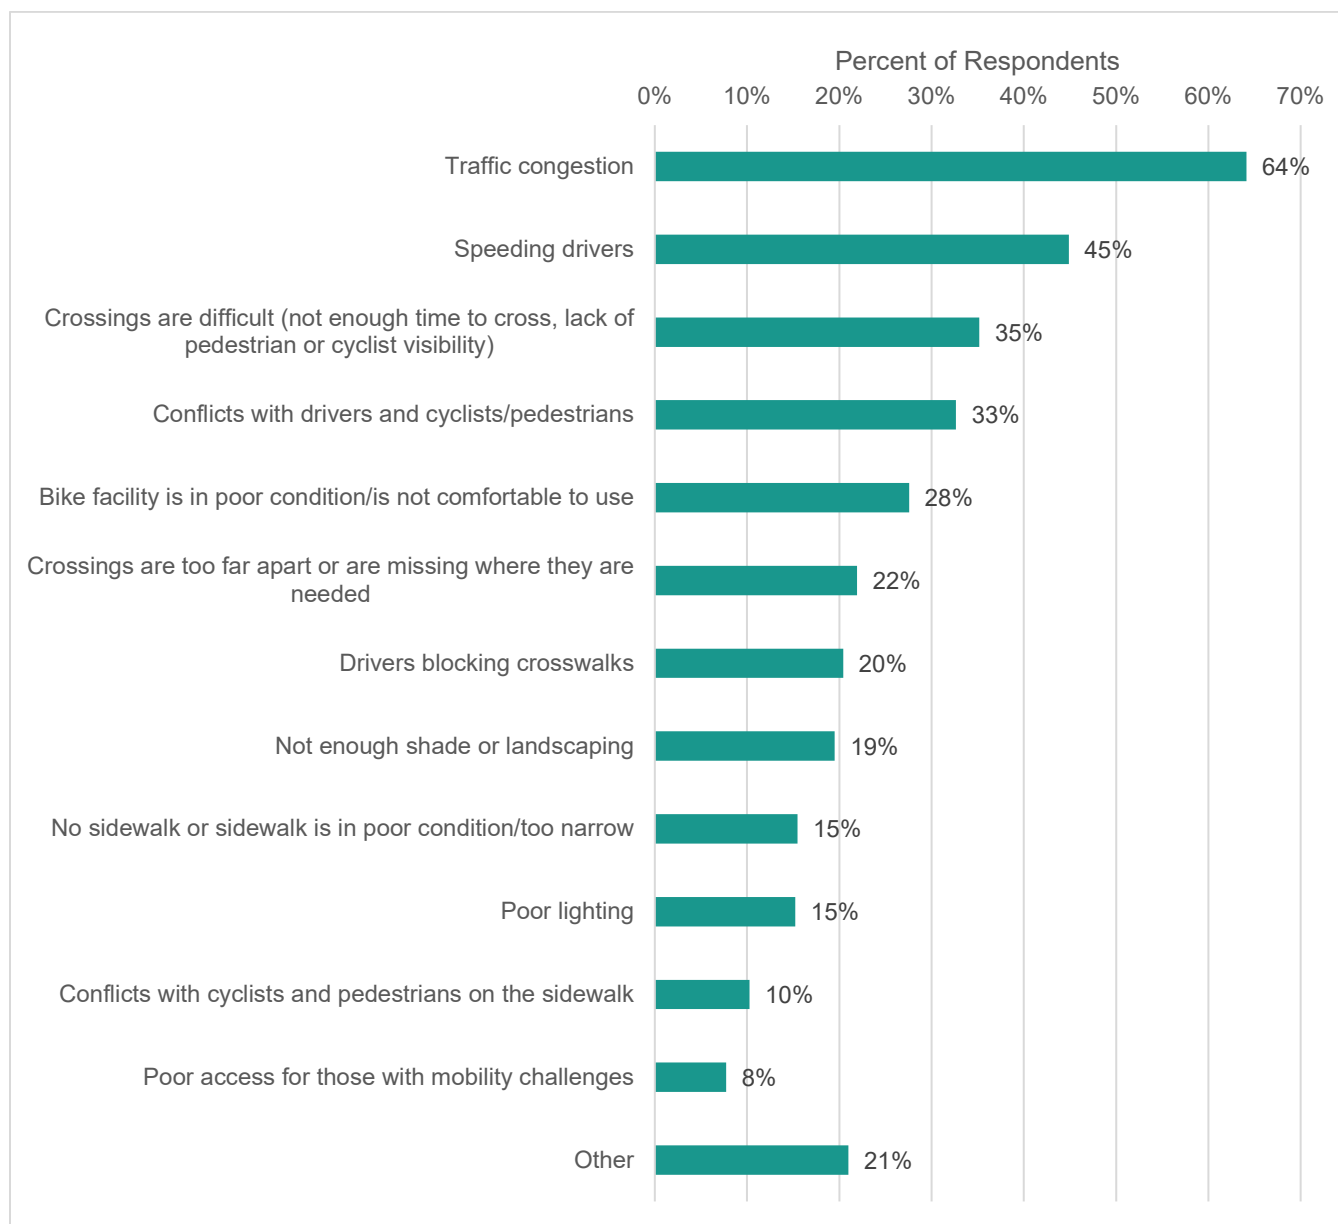

Q5: Which of the following safety challenges do you experience on Rengstorff Avenue?

For this question, respondents were asked about their safety concerns. Respondents were presented with 12 different concerns, and could also input an additional concern under “Other”. As show in **Figure 9**, a majority of respondents selected traffic congestion (64%). Speeding drivers (45%), difficult crossings (35%), and driver conflicts with cyclists and pedestrians (33%) were also common selections.

Figure 9: Which of the following safety challenges do you experience on Rengstorff Avenue? Select all that apply.

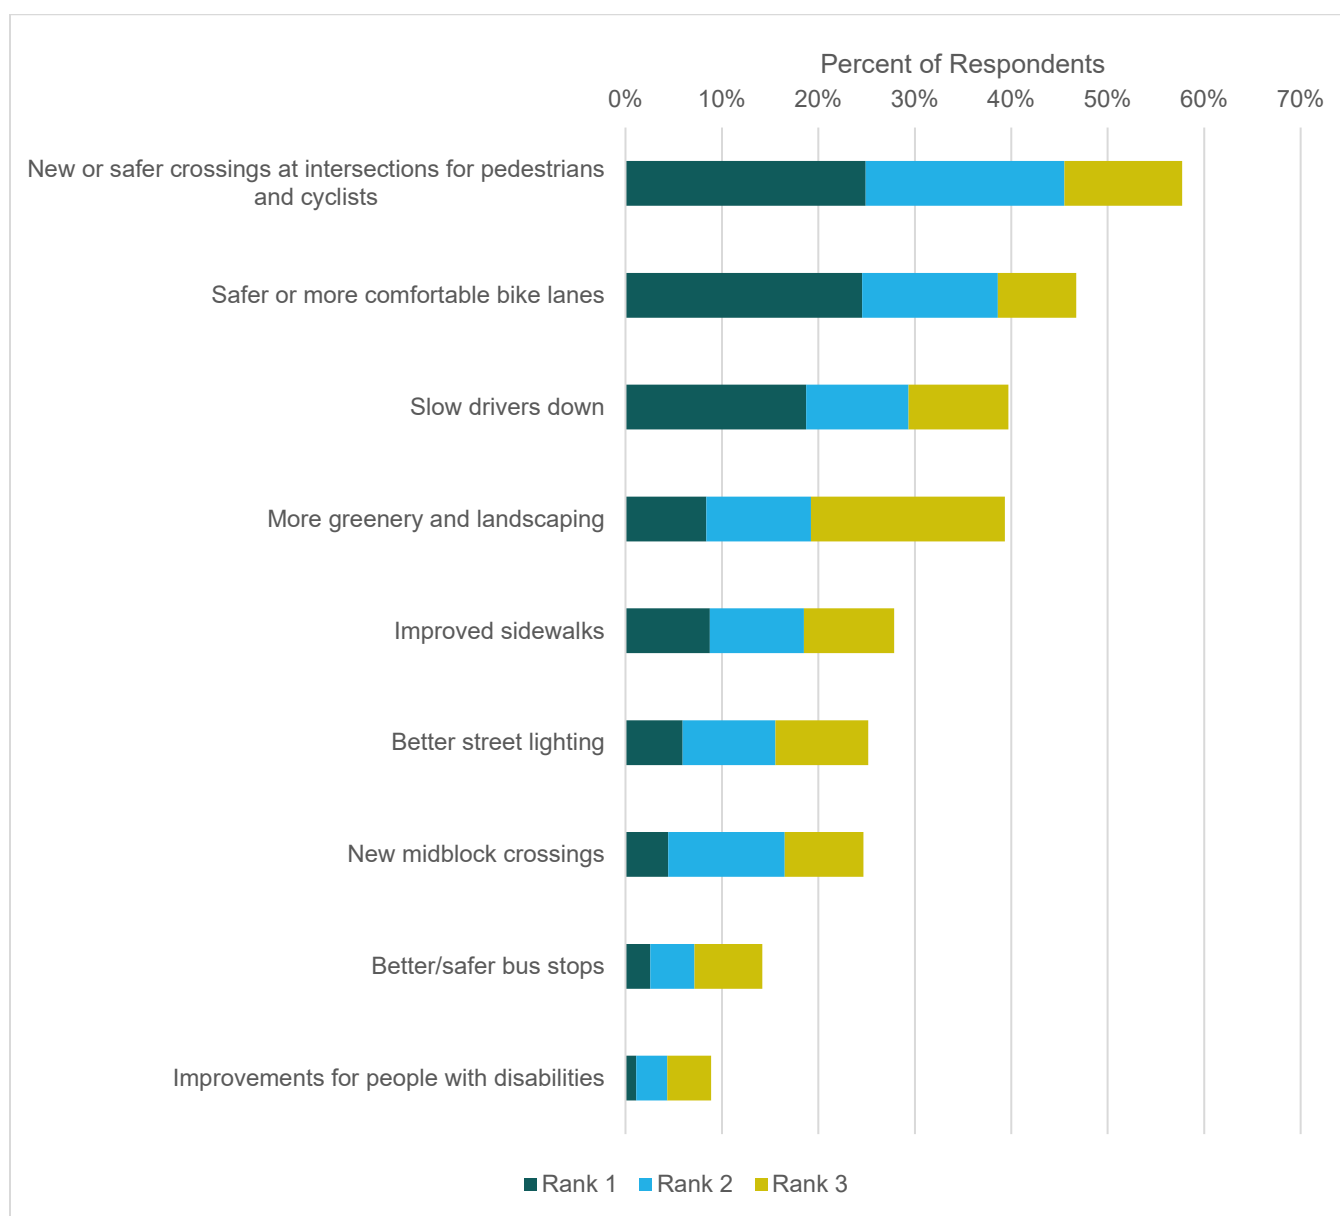

Q6: Which of these safety improvements would be the most meaningful on Rengstorff Avenue?

For this question, respondents were provided with nine improvement ideas and asked to rank up to three of the improvements, in order of perceived importance. The results are shown in **Figure 10**. A majority of respondents ranked safer bike and pedestrian crossings in their top three. Safer bike lanes, slowing down drivers, and more greenery/landscaping were also commonly chosen in respondents' top three choices.

Figure 10: Which of these safety improvements would be the most meaningful on Rengstorff Avenue? Select and rank up to 3.

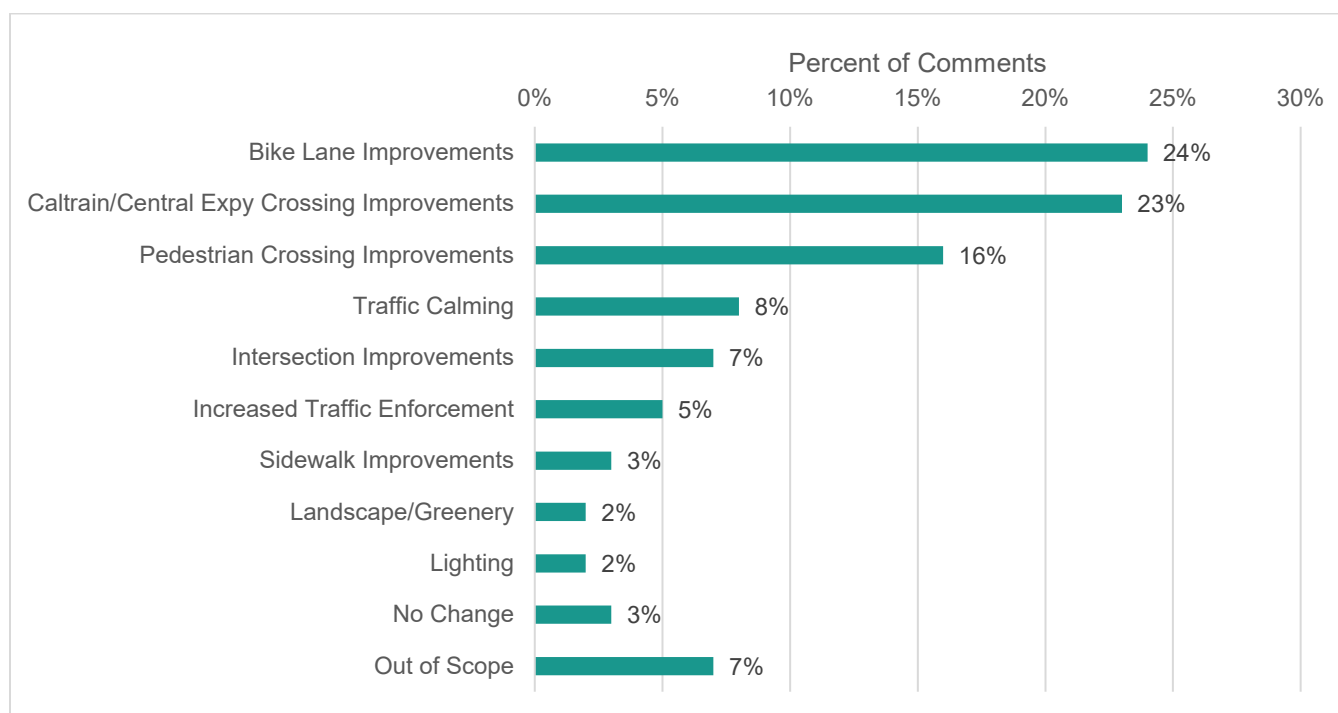

Q7: What is the single most important improvement you would like to see to make Rengstorff Avenue safer?

This question was open-ended and allowed respondents to share additional feedback about their experience traveling along Rengstorff Avenue. 698 comments were received and categorized by primary focus to further understand common themes. Some comments were tagged with “out of scope” if they described issues outside of the focus area or not within the scope of this Project. The results are shown in **Figure 11**, and each comment category is discussed in detail below. The most common improvement types mentioned by respondents were bike lane improvements (24%) and improving the Caltrain and Central Expressway Crossing (23%). Pedestrian crossing improvements were also frequently mentioned (16%).

Figure 11: What is the single most important improvement you would like to see to make Rengstorff Avenue safer?

Bike Lane Improvements

- Support for protected or separated bike lanes similar to the California Street improvements
- Concerns about "dooring" risks from parked cars too close to bike lanes
- Cyclists want physical barriers between bike lanes and vehicle traffic

Caltrain/Central Expressway Crossing Improvements

- Many respondents find this intersection difficult to navigate
- Support for grade separation (underpass/overpass) and better lane markings
- Improved signal timing and safer merging for cyclists crossing the train tracks needed

Pedestrian Crossing Improvements

- Desire for crosswalks equipped with flashing warning lights, especially near Safeway and many mid-block locations
- Drivers don't stop for pedestrians at uncontrolled crosswalks
- Requests for better pedestrian visibility and more time to cross at signals

Traffic Calming

- There is frequent speeding and reckless driving on Rengstorff
- There is a need for physical infrastructure to slow vehicles (narrower lanes, road diets, speed bumps)

Intersection Improvements

- Respondents want better signal timing to reduce congestion and improve traffic flow
- Comments mention the need for dedicated turn lanes and clearer lane markings at certain intersections

Increased Traffic Enforcement

- Concerns about drivers running red lights, especially at Montecito intersection
- Requests for ticketing speeders, more police presence, and enforcing no-parking zones
- There is a desire to have the "No Trucks" restriction more stringently enforced.

Sidewalk Improvements

- Requests for wider, better-maintained sidewalks

Landscape/Greenery

- Requests for more greenery, trees, and landscaping along Rengstorff Avenue
- Interest in green infrastructure such as landscaped medians and tree-lined sidewalks

Lighting

- Better street lighting is needed for nighttime safety, especially at crosswalks and intersections

No Change

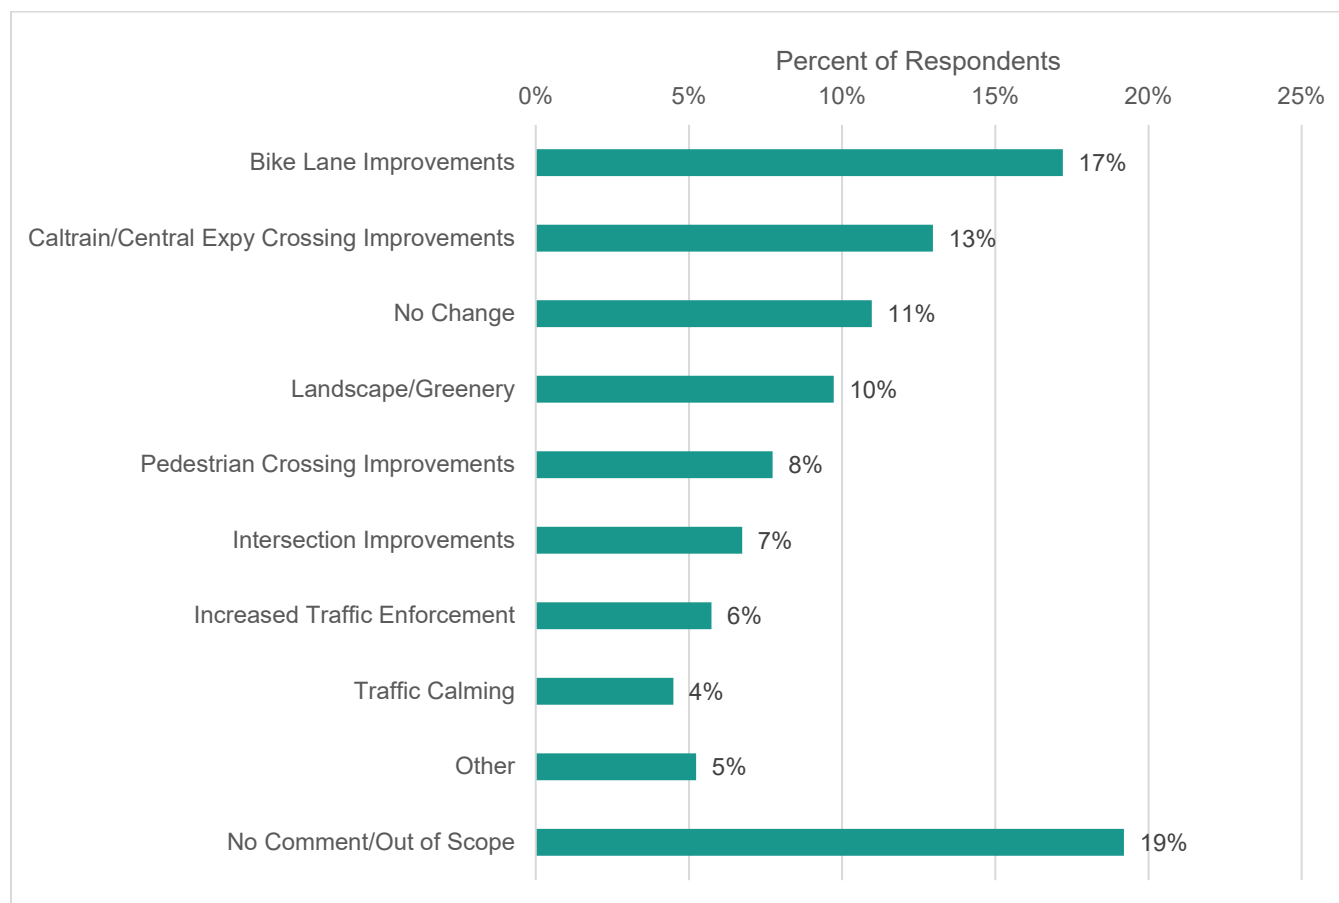

- Some comments express opposition to major changes, particularly referencing California Street lane reduction as a negative example
- Concerns that changes will increase congestion and make commuting more difficult

Q8: Do you have anything else to share?

For this question, residents were given an opportunity to share any other thoughts they had about the Project. 401 comments were received and categorized. A “No Comment/Out of Scope” category was created to capture comments saying “No” or “N/A” (which accounted for 25 comments) and comments describing issues not within the scope of this Study or that did not reference a specific issue or improvement along Rengstorff Avenue (such as requesting other improvements in other parts of the City). The results are shown in **Figure 12** and the full responses are included in **Appendix D**. Overall, respondents brought up many of the same themes as in Question 7. There were nonetheless a couple of differences. More respondents voiced their desire to keep the existing roadway configuration along the corridor (11%). Landscape and greenery improvements were also brought up more often (10%).

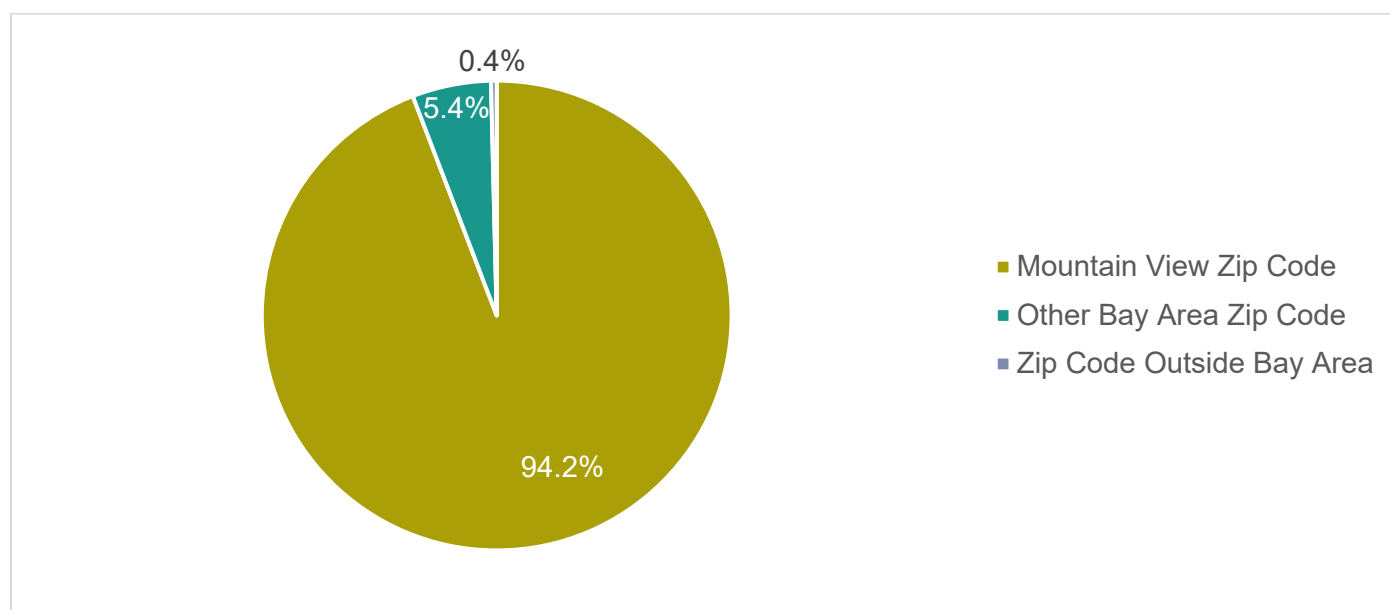

Figure 12: Do you have anything else to share? Please respond below.

Q9: What is your home ZIP code?

Respondents were given an opportunity to share their home zip code was. As shown in **Figure 13**, almost all respondents live in Mountain View (94%).

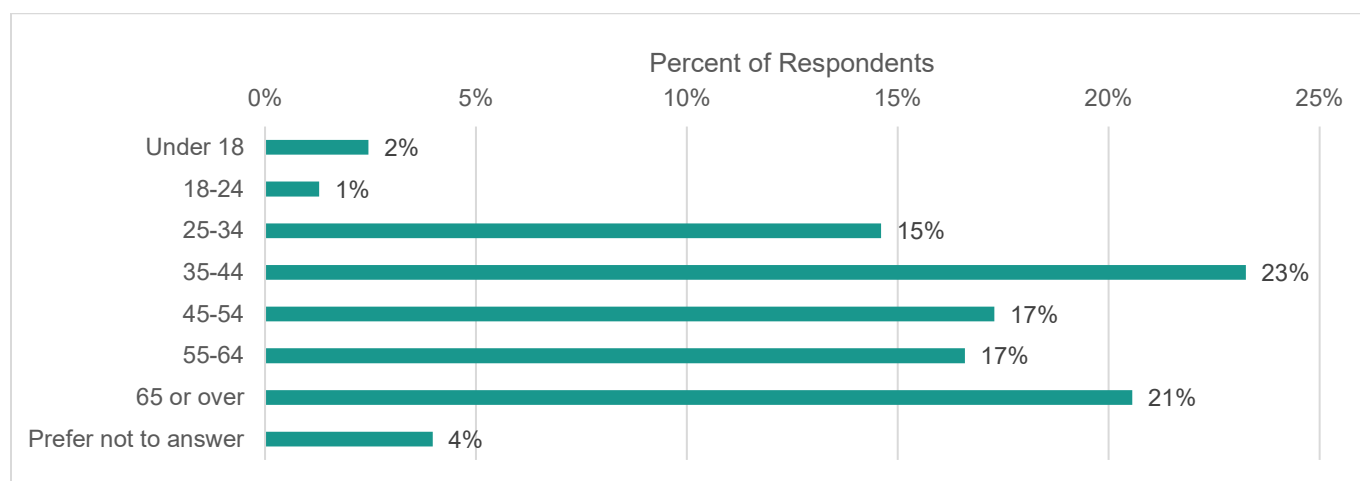

Figure 13: What is your home ZIP code?

Q10: What is your age?

Respondents were given an opportunity to share their age. As shown in **Figure 14**, most respondents are 25 or older.

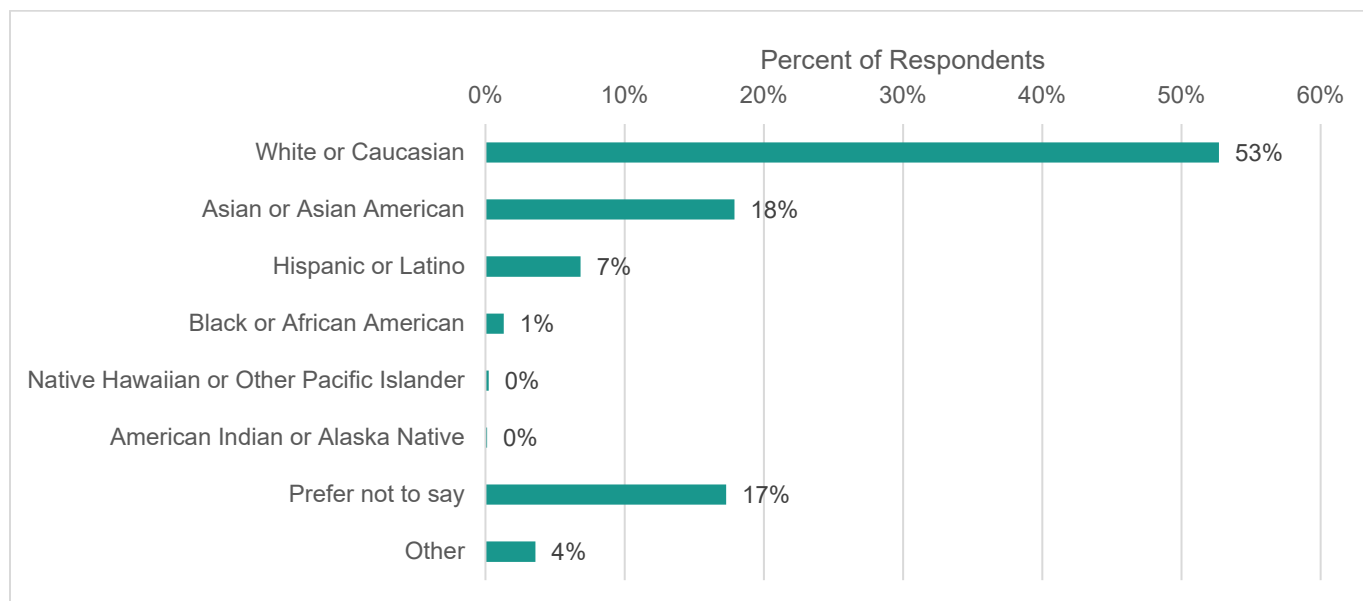

Figure 14: What is your age?

Q11: What is your ethnicity?

Respondents were given an opportunity to share their ethnicity, shown in **Figure 15**. A majority were White or Caucasian.

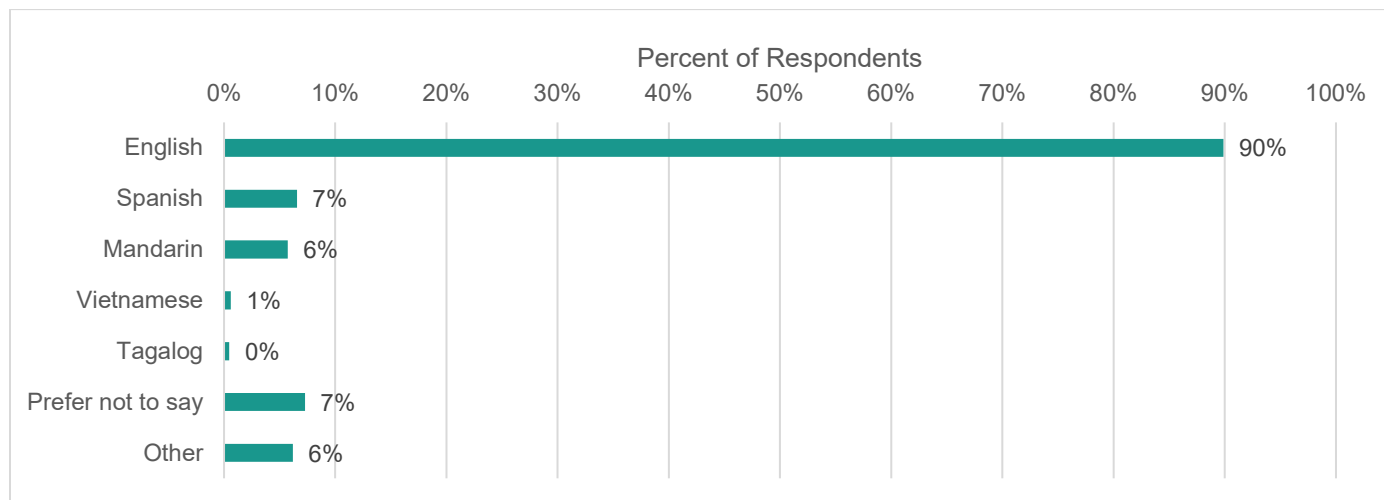

Figure 15: What is your ethnicity?

Q12: What language do you speak at home?

Respondents were given an opportunity to share what language(s) they speak at home, shown in **Figure 16**. English was the predominate language spoken at home.

Figure 16: What language do you speak at home? Select all that apply.

Next Steps

The feedback provided from the community will be used to identify spot improvements along the corridor and overall corridor configuration options that improve access along Rengstorff Avenue and address community concerns. The Project team will share the proposed improvements with the community in the late summer/early fall of 2026 to gather their feedback again and refine the improvements.

Community Walk and Bike Event Overview

Date: Friday, February 27, 2026

Time: 7:45 am – 9:00 am

Meeting Location: Mountain View Community Center (201 S Rengstorff Ave, Mountain View)

Staff:

City of Mountain View: Priyoti Ahmed, Allison Boyer, and Ben Pacho

Kimley-Horn: Monica Tanner, Vanessa Peers, Bryan Kao (biking), and Darren Goh

Agenda:

Time	Description
7:45 am	Meet at the Mountain View Community Center (western entrance near Rengstorff Avenue)
7:45-7:55 am	Opening remarks about community walk and bike ride event and Staff introductions Attendees break into groups for the Northern Route and Southern Route
7:55-8:50 am	Groups travel along their walking routes and stop at key locations for discussion
8:50-9:00 am	Gather back at the Community Center and discuss community's perspective on the types of improvements they would like to see on the corridor
9:00 am	Community Walk and Bike event ends

Southern Route Walking Tour Feedback Form

This roughly 1 mile route will take us south from the Community Center past the parking protected bike lanes on California Street to El Camino Real, and then back north on the opposite side of the street to return to the Community Center.

Time	Description
7:45 am	Meet at the Mountain View Community Center (western entrance near Rengstorff Avenue)
7:45-7:55 am	Opening remarks about community walk and bike ride event and Staff introductions Attendees break into groups for the Northern Route and Southern Route
7:55-8:05 am	Travel to California Street
8:05-8:15 am	Meet at California Street to discuss Class IV parking protected bike lane connection
8:15-8:25 am	Travel to El Camino Real
8:25-8:35 am	Meet at El Camino Real to discuss connection to Los Altos High School and high transit ridership
8:35-8:50 am	Travel to Community Center or give feedback to staff to be shared with the rest of the group (if leaving event)
8:50-9:00 am	Gather back at the Community Center and discuss community's perspective on the types of improvements they would like to see on the corridor
9:00 am	Community Walk and Bike Ride event ends

During the tour, consider where you experience or observe the following:

- Accessibility Challenge
- Biking Challenge
- Driving Challenge
- Transit Challenge
- Walking Challenge
- Other Challenge
- Idea

Share some details about your observations below:

Describe challenges that you recorded on the map:

Discussion Questions:

Stop 1 (California Street): How do you feel about the intersection improvements at California Street? What about the parking protected bike lanes? How would you compare biking challenges on California Street compared to Rengstorff Avenue?

Stop 2 (El Camino Real): How was your experience walking along Rengstorff Avenue? If you had a choice to improve the bicycle lanes/add green space by either removing a travel lane in each direction, or by removing a parking lane, which would you choose to remove?

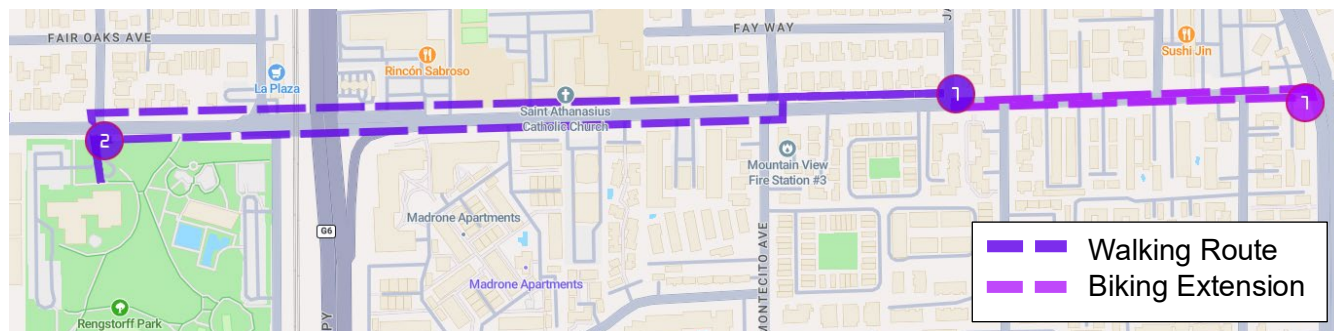

Northern Route Walking Tour Feedback Form

This roughly 1.6 mile route will take us north from the Community Center across the Caltrain tracks to W Middlefield Road (bikers) or to Jane Lane (walkers), and back across Central Expressway before returning to the Community Center.

Time	Description
7:45 am	Meet at the Mountain View Community Center (western entrance near Rengstorff Avenue)
7:45-7:55 am	Opening remarks about community walk and bike ride event and Staff introductions Attendees break into groups for the Northern Route and Southern Route
7:55-8:10 am	Walkers walk to Jane Lane, bikers bike to W Middlefield Road
8:10-8:25 am	Meet at Jane Lane/W Middlefield Road to discuss corridor conditions
8:25-8:40 am	Travel to Community Center or give feedback to staff to be shared with the rest of the group (if leaving event)
8:40-8:50 am	Meet back at the Community Center and discuss access improvements to focus on there
8:50-9:00 am	Gather all together to discuss community's perspective on the types of improvements they would like to see on the corridor
9:00 am	Community Walk and Bike Ride event ends

During the tour, consider where you experience or observe the following:

- Accessibility Challenge
- Biking Challenge
- Driving Challenge
- Transit Challenge
- Walking Challenge
- Other Challenge
- Idea

Share some details about your observations below:

Describe challenges that you observed:

Discussion Questions:

Stop 1 (W Middlefield Road) - Bikers: How had your experience biking along Rengstorff Avenue? If you had a choice to improve the bicycle lanes/add green space by either removing a travel lane in each direction, or by removing a parking lane, which would you choose to remove?

Stop 1 (Jane Lane) - Walkers: How comfortable would you feel crossing Rengstorff Avenue at Jane Lane with rectangular rapid flashing beacons (RRFBs) and a new crosswalk? What are your thoughts about the installation of a traffic signal in this location?

Stop 2 (Community Center): How was your experience traveling from Jane Lane back to here? How is your experience crossing over the Caltrain railroad tracks? Would you feel comfortable doing this on foot and on bike? What challenges do you find that could be addressed with this project?

Community Walk/Bike Northern Route - Biking Challenge Comments

Bryan's notes:

- Community noted that by far this was the scariest part. They agreed that most people would've been uncomfortable taking the lane. Some noted that this maneuver was easier when there is queueing.
- Many mentioned that they avoid biking on Rengstorff specifically due to this location. Some said that they use the San Antonio Caltrain Station underpass instead.
- Some expressed concern over seeing children biking through here during school in the past.

Bryan's notes (cont.):

- Most agreed that Caltrain's grade separation would help with bicycle conditions here.
- Some proposed a ped/bike overpass over the Caltrain tracks near this location.

Bryan's notes:

- Some participants said that the bike lanes did not feel safe due to fears of dooring by parked cars.
- Some thought that the bike lanes were too narrow.
- Some were concerned about cars blocking the bike lane. Note that bike tour encountered a bus at a bus stop that blocked the bike lane.
- Some participants felt confident to be able to bike here.

Bryan's notes (cont.):

- No clear consensus on whether community would rather remove parking or travel lane, but seems to slightly favor removing parking. Arguments for removing parking include that it would eliminate dooring, and that the apartments nearby should already have adequate parking. Arguments for removing travel lane for traffic calming, but participants recognized that it would affect traffic congestion.

Bryan's notes:

- Community expressed interest in more protected bike lanes at intersections to prevent conflicts with right turn vehicles.

Rengstorff Avenue Complete Streets Project Study Outreach Round 1 - Community Walk and Bike Event
PublicCoordinate Pins

Bryan's notes:

(bike tour crossed Rengstorff at Rock Street to experienced perpendicular travel)

- Community noted that cars often do not stop for crossing pedestrians or bikes.
- Community wondered if this intersection could be a signalized intersection since it's a bike route.

Bryan's notes:

- Some community members said that they feel more comfortable on lower-speed bicycle routes, and proposed that the City should place more emphasis on these instead.

Need bike detection for bikes turning left out of the Community Center

No bike detection for bikes traveling southbound and making a left on to Central Expressway

Community Walk/Bike Northern Route - Idea Comments

Consider a mid-block crossing between Central Expwy and Montecito Ave

Community likes the landscaped buffer between the sidewalk and roadway

Some concern for another traffic signal to be installed at Jane Lane

Community Walk/Bike Northern Route - Other Challenge Comments

Challenges that gates are also down when train is at San Antonio

Many people cross mid-block at San Ramon Ave even though there is no crosswalk and two nearby

Community Walk/Bike Northern Route - Walking Challenge Comments

Signal timing does not seem to be reflective of pedestrian push-button activation

Rengstorff Avenue Complete Streets Project Study Outreach Round 1 - Community Walk and Bike Event
PublicCoordinate Pins

Drivers are pulling out of San Luis Avenue very fast and are not looking for bikers or pedestrians

Community would like PHBs at mid-block crossings

Community Walk/Bike Southern Route - Accessibility Challenge Comments

Have observed mobility devices in bike lanes as sidewalks are not ADA compliant

Community Walk/Bike Southern Route - Biking Challenge Comments

Insufficient width for parking and bike lane - consider parking removal

Repainting bike lanes is critical - we also heard this comment from school age children cycling along the corridor

Include bike crossings here - heavy bike traffic to school

5ft bike lanes are too narrow and hard to pass; parked cars do sometimes intrude into bike lane; can only comfortably go 12mph or less

Bike lane not continuous - becomes Class III here which is not appropriate for this road

Paint worn and bike lane too narrow when cars are parked

San Antonio is not an option for biking - Rengstorff is the better of two evils

High speed roadway with lots of driveways

Bike lanes might exist and be ~5ft but that usually includes a gutter so the bike lanes are uneven and the pavement quality also isn't good. Observed people riding on the sidewalk

Community Walk/Bike Southern Route - Driving Challenge Comments

Suggestion for dedicate PUDO zones in front of high density residential developments so that vehicles do not block travel and bike lanes

Concerned grade sep project will add to traffic on Rengstorff as more people will choose this route to avoid waiting at a at-grade crossing

Not against removal of parking as could discourage over occupancy of rental units but likely will get push back from residents

Community Walk/Bike Southern Route - Idea Comments

New housing development - would be nice to have a paseo around the back that connects to El Camino at Distel

Provide an additional crossing here and allow for use of land above Hetch Hetchy system

Love improvements at California Street

Tighten up corners of the intersection to slow down speeds of turning vehicles

Question about why the protection on two of the corners was recently removed (NE and SW) - City responded to accommodate turning buses and trucks

Community Walk/Bike Southern Route - Other Challenge Comments

Drainage issue at SE corner of California - often water in bike lane so bicyclists use travel lane. Fix drainage issue

Liquid Amber is very poor choice of tree - they drop balls which are hazards

Lots of utilities and mature trees on the west side which might make it more challenging to move curb/accommodate bike lanes

Community Walk/Bike Southern Route - Walking Challenge Comments

Distance between crossings at Latham and California is too long - often see people crossing midblock and taking refuge in median. Consider midblock crossing

No marked crossing on eastern leg

Long walk between Rengstorff and Ortega

Also to enhance connection to housing development on south side of El Camino (currently under construction)

Feb 07, 2026, 04:10 PM	Kids biking home from LAHS have to turn left by merging with cars and getting into the left turn lane, which is very risky. Can this intersection be reworked for better safety and accessibility for walkers, cyclists etc? I realize it will require coordination with Caltrans and the city of Los Altos. Thx!	Biking Challenge	2
Jan 30, 2026, 08:14 PM	Unclear bike lane markingw when turning on to El Camino, bike lane is in between right turn (have to cut across cars trying to turn right) and left turn lanes, but arrow points straight across.	Biking Challenge	13
Feb 01, 2026, 01:29 AM	I regularly see cars that want to turn right onto El Camino cut through the bike lane seriously endangering the cyclists.	Biking Challenge	5
Feb 01, 2026, 01:33 AM	Cars trying to turn right can form a wall that bikers can't get across leading to many bikes using the crosswalk instead which is a lose lose situation.	Biking Challenge	5
Jan 31, 2026, 02:01 PM	The unclear bike lane markings here are a good thing and must not be changed, because if the way it adds to the "biking challenge" here. This one "challenges" you to allow Jesus to take the handlebars, as it were, and put your faith in God the Almighty which is the only true test of one's faith. Without challenges, our lives would be vapid and meaningless. Facing a challenge like this biking challenge here is a good thing because we will all come out stronger on the other side.	Biking Challenge	2
Jan 30, 2026, 08:31 PM	Bike lane for turing left is on right side of through lane so bikes turning left will get hit by cars going straight. A lane needs to be marked to show correct position for bikes turning left as many drivers are confused as to why bikes are not in bike lane	Biking Challenge	5
Jan 31, 2026, 02:09 PM	There should be NO CHANGES made to this intersection: this is called a "biking challenge" not because it's supposed to be easy for a cyclist to navigate; it is MEANT to be a challenge, which is why we call it a "biking challenge."	Biking Challenge	1
Jan 31, 2026, 01:37 AM	Intersection sometimes seems to not detect cars in one of the southbound lanes - the light doesn't change until someone arrives on the other lane.	Driving Challenge	1
Jan 30, 2026, 08:35 PM	No crosswalk on east side of Rengstorff to cross El Camino. Streets like Jordan in Los Altos have crosswalks on both sides of street. Not having crosswalks on both sides add extra distance and delays for people walking so many dash across street creating safety hazard. With the increase traffic from the new housing at the intersection, crosswalks need to be on both sides of Rengstorff	Walking Challenge	12
Feb 01, 2026, 01:31 AM	Agree. Lots of kids walking to and from school need to cross here	Walking Challenge	4
Feb 01, 2026, 01:30 AM	Agree. need another crosswalk here	Walking Challenge	3
Feb 01, 2026, 08:08 AM	Agreed. Doesn't need to activate without a button press but is also has a ripple effect helping cyclists cross there so that they don't need to go North on the southbound side when departing the high school which makes behavior more predictable for cars at the Latham intersection and the sidewalks safer for pedestrians	Walking Challenge	3
Jan 31, 2026, 01:58 PM	This spot is a very good "walking challenge." I actually think at least one of the existing crosswalks must be eliminated at this intersection because it would increase the "challenge." I never back down from a good challenge, and neither should my fellow MV residents, because we should all recognize that facing difficult challenges is the only way we can grow and improve ourselves.	Walking Challenge	1
Feb 07, 2026, 04:18 PM	Cars take this turn really quickly and are not looking for pedestrians	Walking Challenge	2
Feb 12, 2026, 01:05 AM	Agreed, cars rarely look for pedestrians even when the signal is on. Better, raised, and more visible crossings are needed	Walking Challenge	1

Feb 13, 2026, 05:39 AM	Bike lane is very narrow here, but a "Road work ahead" sign was placed in the bike lane, forcing cyclists into traffic.	Biking Challenge	1
Feb 26, 2026, 10:02 PM	I see this frequently throughout the city. We need to stop allowing signs to block the bike lane when it is not actually closed off. 90 plus percent of the time it is a sign intended purely for motorists, at the expense of cyclist safety	Biking Challenge	0

Feb 01, 2026, 08:02 AM	Merging the cars and bikes is really awkward when the light turns green because it's not certain who will go first. The share the road sign makes it clear we have to but doesn't hint as to how.	Biking Challenge	2

Jan 30, 2026, 08:28 PM	Bike Lane too narrow to accommodate bikes	Biking Challenge	7

Jan 31, 2026, 02:04 PM	The "biking challenge" here is that the bike lane narrows. This challenges bikers to practice and improve their balance, which is something we all should be doing, anyways. Facing challenges like this one head on is a good thing because, even though it might feel "unsafe" or "life threatening" at the time, you will come out on the other side of it a stronger and more capable person, ready to conquer any "challenge" that life throws at you.	Biking Challenge	1
Jan 31, 2026, 03:03 AM	Bike lane uneven, meaning a puddle exists here most of the time as well as a significant bump	Biking Challenge	5
Jan 31, 2026, 02:14 PM	Some residents don't seem to understand that the bike lane is uneven here for the purpose of creating the large puddle through which the bike lane passes(as well as the significant bump). That is why this spot is a "biking challenge," and not a "biking easy." It is important we, as cyclists, have challenges like this because it challenges us to improve our skill and maintain spatial awareness at all times. The puddle and the bump stay.	Biking Challenge	1
Feb 01, 2026, 07:57 AM	The puddle is even wet when it hasn't rained, the splash feels dirty.	Biking Challenge	1

Feb 07, 2026, 04:31 PM	Usable bike lane very narrow here due to offsets between the asphalt and concrete	Biking Challenge	2
Feb 24, 2026, 05:03 PM	This intersection has become significantly congested since the recent lane reduction. During peak commute times, traffic consistently backs up along California St, creating long queues and delays for local residents. Vehicles turning right onto Rengstorff heading southbound frequently require multiple light cycles, resulting in increased idling, noise, and emissions. Please consider removing the bollards at the right-turn corner or adding a dedicated right-turn-only lane to restore traffic flow.	Driving Challenge	1
Feb 01, 2026, 04:32 PM	This intersection has become a problem with heavy traffic and pedestrian use. Traffic backs up in all directions and will only get worse with new construction.	Driving Challenge	2

Feb 01, 2026, 07:37 AM	South of Central, Rengstorff could honestly be a 2-lane road (one in each direction) and 25mph. The 5 traffic lights make progress through here slow anyway. If you calm the traffic enough, bike lanes could even be optional. I'd rather bike down a street like Montecito (no bike lane) than, say, Calderon (with bike lane).	Idea	2

Feb 01, 2026, 08:12 AM	Bike lane significantly narrows and with street parking becomes almost less than the width of a bike. Feb 27, 2026, 12:14 AM	I want to get from Rengstorff to Crisanto coming southbound, and I end up crossing here as a pedestrian. I almost always end up just crossing against the light because it takes so long, and there are natural gaps in the traffic.	Biking Challenge	0
Jan 30, 2026, 08:09 PM	Merging into traffic is unsafe/risky especially when there are a lot of impatient/speeding drivers	Biking Challenge	9
Feb 01, 2026, 01:51 AM	Yes, the bike lane ending is very stressful, and cars start signaling right for Central before Crisanto.	Biking Challenge	2
Feb 04, 2026, 01:23 AM	My philosophy is stay on side streets with less auto traffic as much as you can. But if you must in the case of the Crisanto/rail crossing I have a really good fix. The light should turn green for walkers and cyclist first for 10 seconds before the light changes for the cars. That way you can make it across Central EXP before the cars catch up. They already do this in many intersections around town. For example, Almond and San Antonio in LA is a great example it just needs a few more seconds added on.	Biking Challenge	2
Jan 31, 2026, 01:54 PM	Merging into traffic here, as a biker, may feel unsafe or risky, but that is perfectly normal and by design. As we can see here on the map, Rengstorff Avenue has zero safety problems. The only thing it has are "challenges," and regardless what kind of a challenge a person faces in life, we all must remember that once we overcome a difficult challenge, we come out on the other side as better, stronger people. In fact, I don't think this one is challenging *enough* - I want the bike lane to be narrower here.	Biking Challenge	1

Feb 01, 2026, 07:54 AM	Yes! It's bad that it feels sometimes faster and safer to double merge into the left lane, cross Central, and then double merge back into the right lane in order to not get hit in the right turn process. And merging is not safe.	Biking Challenge	1
Jan 31, 2026, 03:07 AM	Given the sharrows, bikers usually cross via the crosswalk, which would require either a sharp turn to get back onto the bike lane or they'd continue ahead on the sidewalk to the slip lane	Biking Challenge	2

Feb 01, 2026, 06:21 PM	It is annoying to try to turn right onto Rengstorff from Crisanto, especially during rush hour, because of the long wait times. This is made worse by the peak Caltrain traffic.	Driving Challenge	0
Feb 05, 2026, 08:28 AM	The lanes that go forward across the tracks and central bend in ways those unfamiliar do not expect. I've regularly seen cars from the right lane (that goes forward) veer into the second (left) lane that goes forward and cause a near collision. And left lane (going forward) cars need to regularly clip the left turn lane to avoid collisions.	Driving Challenge	0
Feb 12, 2026, 11:49 PM	This intersection should be removed and Cristiano should be turned into a dead end. So many people use it to cut through instead of using properly sized streets like California, making cars turning here wait for a long time, stop over crosswalks and disregard people biking across the tracks. Feb 14, 2026, 09:54 PM	I live on Rengstorff and this is my commute every morning. The congestion here is terrible and the light cycle is incredibly long. If the train comes, we reset and have to wait again. Making a right turn onto Central Expressway is awful. If you are planning on closing a lane of Rengstorff to make room for more cyclists then you are making a huge mistake, this is some of the worst traffic flow in the entire city and I have to do it every morning. Please help car traffic flow better, not worse, I implore you.	Driving Challenge	0

Feb 14, 2026, 05:49 AM	The left turn lanes are confusing, and many cars still drive straight. Even the right lane is confusing as cars drive straight and don't follow the shift to the right. Please straighten the lanes, as that is the most logical way to drive.	Driving Challenge	1
Feb 01, 2026, 01:33 AM	There should be a dedicated right turn lane here for when light is red from trains. especially frustrating when light cycles multiple times in a row. would alleviate traffic	Driving Challenge	3
Feb 01, 2026, 02:07 AM	Agreed, cars often end up cutting through the gas station to deal with this. In general, this intersection becomes very congested during rush hour: getting across the train tracks can take a really long time.	Driving Challenge	3
Feb 19, 2026, 02:04 AM	The traffic lights reset when trains pass. Sometimes this results in red lights in all directions. Can we change the traffic light programming to allow traffic not passing over the tracks while the train is passing to keep some vehicles moving?	Driving Challenge	0
Feb 19, 2026, 02:32 AM	At least, we should allow left turns onto central as long as there are cars waiting. One time in the evening, some crew was doing maintenance/electrification work on the tracks and closed the crossing, and I was stuck for 30 minutes trying to make a left turn.	Driving Challenge	0
Feb 01, 2026, 04:37 PM	The access to this gas station just after a busy intersection is a hazard. Drivers turning onto Central from Rengstorff need to immediately slow down to allow drivers to enter or exit the gas station.	Driving Challenge	1

Feb 09, 2026, 07:17 PM	Close this intersection to cars entirely. Cars could use other streets like Shoreline and San Antonio that have bridges. Build a tunnel or bridge for pedestrian/bikes. Two nice side-effects: The Caltrain doesn't need to honk there anymore (the honking is disruptive when trying to relax in Rengstorff park). The area south of Caltrain will become quieter due to reduced traffic and nicer to live in.	Idea	2
Feb 12, 2026, 01:08 AM	Great idea! There's already so many grade separated ways to cross the tracks for cars.	Idea	1

Feb 12, 2026, 11:42 PM	I feel like at least once a month caltrain gets delayed/suspended because of cars getting hit while on the tracks. Not necessarily here, but throughout the peninsula. Closing it to cars would make it much safer and faster to take the train too.	Transit Challenge	1
Feb 01, 2026, 01:42 AM	This crosswalk is almost always red, even when both directions for cars are also red. This means unnecessary wait times, or jaywalking. It would be beneficial to adjust the cycle to always be green for pedestrians whenever cars have red lights and when the train is crossing, regardless of button presses. This does not require making the light red more often for cars.	Walking Challenge	6

Feb 01, 2026, 06:36 AM	YES! I actually prefer the old uncontrolled intersection. It was horrible, but at least I could cross in a reasonable time. The intersection was messy, drivers were more cautious, and we all had to negotiate to make things work. Now drivers get a big green light, and all the entitlement in the world. I get to choose between "jaywalking" in front of them, or waiting forever.	Walking Challenge	1
Feb 14, 2026, 01:53 AM	The crosswalk situation getting from Crisanto Ave to La Plaza is kind of hard. You have to wait a long time for the lights and it's frustrating because you have to cross two streets even though it's right there	Walking Challenge	1
Feb 28, 2026, 08:15 AM	The timing for this crossing is terrible going south on this side as it's always red. It would be great if it's linked with the crossing at central.	Walking Challenge	0

Jan 31, 2026, 01:45 PM	Facing and overcoming "challenges" makes one stronger and more self-sufficient; better able to deal with the difficulties life throws at them. That is why I think we actually need to create more walking and biking "challenges" on Rengstorff in order to strengthen the minds and bodies of Mountain View residents. When I'm biking North on Rengstorff past Montecito Ave. during rush hour, I actually prefer to close my eyes completely b/c if a car tries to merge into me it challenges my senses to react better. Feb 20, 2026, 05:44 AM	The red light here gets run every day	Biking Challenge	1
Feb 19, 2026, 02:24 AM	Right turn on red rule can be a bit confusing. There's a fixed sign that prohibits right turn on red. There's also a no-turn signal that only seems to light up when there's movement in/out of the firehouse. While the rules are clear in this case that no turn on red is allowed, many drivers seem to ignore it, perhaps because they assume it's ok because the no-turn light is not on.	Driving Challenge	0

Feb 01, 2026, 04:30 PM	The side walks are too narrow and do not easily allow people to pass each other. The street parking protects pedestrians from the busy traffic, but if street parking is taken away and trees/landscaping/bike lanes could serve to protect pedestrians.	Walking Challenge	1

Feb 01, 2026, 07:55 AM	Yes! Static solutions like reflective crosswalks aren't going to catch drivers' attention here. Flashing lights would massively enhance safety.	Walking Challenge	5

Feb 02, 2026, 11:35 PM	Dangerous crossing, needs signals. I would really like to use this one but since it's so dangerous I always avoid it and cross at middlefield instead which adds a few minutes of detour.	Walking Challenge	3
Feb 14, 2026, 05:32 AM	This crosswalk NEEDS flashing safety lights for both directions. Daytime, and even worse at night, is very difficult to see pedestrians. Sometimes one lane of cars stop, but others are not paying attention. Also there's a lot of speeding in both directions, making even more dangerous for those attempting to cross.	Walking Challenge	3
Feb 14, 2026, 08:27 PM	Parked cars on Rengstorff make it hard for drivers coming either way to see pedestrians. And cars/drivers speed up when drivers see the traffic signal at Middlefield green.	Walking Challenge	1
Feb 15, 2026, 11:12 PM	While driving, the person in the adjacent lane never realizes that I am yielding to pedestrian right of way.	Walking Challenge	1

Feb 16, 2026, 12:22 AM	This crosswalk is very dangerous to cross. And is poorly located. The parked vehicles make it difficult for cars to see pedestrians until they are on the road. Additionally, many seniors living in the residences along San Ramon will cross between the lights and crosswalk because it is too far away. It would be better to have the crosswalk closer to San Ramon in addition to having more visibility (flashing lights, no cars parked on the streets)	Walking Challenge	0
Mar 01, 2026, 06:48 AM	Please add flashing lights to this crosswalk, cars seldom see pedestrians in this crosswalk and stop. It is used by several elderly people going from their community to the stores on the other side of Rengstorff	Walking Challenge	0

Feb 25, 2026, 04:37 AM	1) move cross walk up to San Ramon. Its current location is too far from the residents and elderly that use it. 2) Add flashing lights pedestrian stop sign here otherwise cars will not see you 3. Add night lighting. Pedestrians are invisible at night 4. Cars FREQUENTLY block the San Ramon intersection causing jams and swerving and obstructions to oncoming cyclists. Maybe that can be solved at the same time 5) if adding bike lanes, do not prevent cars turning right from San Ramon; shift the bike lanes	Walking Challenge	0

Feb 19, 2026, 01:56 AM	Vehicles frequently speed at this area. Can we deploy speed cameras to ticket speeding vehicles?	Driving Challenge	1
Feb 09, 2026, 10:39 PM	The street is very wide and dangerous to cross at any age. Many cars dont stop and I think part of the problem is poor visibility to identify the pedestrians. Same issues for bikes that want to cross - with our child we need to go down from the bike and cross by walking to ensure we have enough time to stop if a car is not stopping. Here many kids cross to go to school in the morning and in the afternoon. It is a very sensitive point of the street. A midblock and stronger / more impactful lights might help.	Walking Challenge	1
Jan 31, 2026, 01:32 AM	Please make the pedestrian crossing at this intersection get Red (cars need to stop) rather than Yellow (good luck, hope a car doesn't kill you) lighths.	Walking Challenge	6
Feb 02, 2026, 10:36 PM	It's a miracle that someone hasn't been killed on this crossing. Visibility is terrible for cars, the lights are almost impossible to see in the daylight, and only ~50% of cars actually stop. Please, please, make this a red light, or at the very least, put up more forceful signage.	Walking Challenge	3
Jan 31, 2026, 01:38 PM	Who came up with that nice little euphemism of "safety challenges" that we're using here? I ask because I would like to thank them - I had a long day today, and realized I hadn't laughed this hard all week. "Challenges!? I love challenges! You know how when you try to stay alive and maintain your own physical safety when you want to walk to the grocery store? Suuuuch a great "challenge"! I love 'challenges'! This city should have more 'challenges'! Overcoming 'challenges' actually makes us stronger!"	Walking Challenge	2
Feb 02, 2026, 11:23 PM	I live right next to this intersection (address is Rock Street) and use this intersection daily. It's super unsafe as both a driver and a pedestrian. Please revisit the strategy here. I know adding a red light here may not be feasible since it's so close to the W. Middlefield intersection. But as other comments have mentioned, it's a very precarious intersection with low driver visibility, drivers often speed through, and the street is so wide that it's easy to miss a pedestrian waiting on the sidewalk.	Walking Challenge	2
Feb 14, 2026, 02:11 AM	I work here as a school crossing guard. Helping defend children against their neighbors bad driving is owrk measured against the percentage of drivers who speed or often ignore a handheld stopsign or whistle. Drivers also make left turns into southbound Rengstorff while pedestrians are in the crosswalk or begin turns before everybody is out of the crosswalk. Something must be done about the speeders between Middlefield and Old Middlefield.	Walking Challenge	0

Feb 02, 2026, 11:26 PM	I've seen a number of drivers that just got off of the 101 blow through red lights here (going west on Old Middlefield). While I don't recommend a red light camera, I do think we need to have some sort of safety measure to ensure this intersection stays safe. I have nearly gotten into a severe accident with someone who ran a red here.	Driving Challenge	2

Feb 01, 2026, 02:15 AM	This traffic light doesn't seem coordinated with the next one (at N Rengstorff). It often turns green while the next light is still red, leaving no space for cars to move forward.	Driving Challenge	4

Feb 04, 2026, 04:00 AM	Students cross at the light at Rengstorff and El Camino then are biking the wrong way up the sidewalks as it is the safest way to go here. A pathway behind the corner store and then a safe path crossing at Distel would have everyone going the right way and avoid the dangerous El Camino and Rengstorff intersection.	Biking Challenge	4
Feb 07, 2026, 04:03 PM	This would be great! And could the 5150 building have a sidewalk that enables pedestrians and cyclists to safely cross ECR on the south/east intersection that is currently blocked?	Biking Challenge	1
Feb 12, 2026, 03:53 AM	Yes! The LAHS Sustainability Committee has been requesting thrust paseo for years. We need a safer way for students to get to school from MV, so more students will bike to school.	Biking Challenge	1
Feb 01, 2026, 06:26 AM	This would be a great biking/walking route to connect people to the train station, the park, and homes and businesses. But there is a locked gate here. The alternative is to bike down Central, or take a long detour through California.	Biking Challenge	3
Feb 26, 2026, 10:12 PM	I second this! Please eminent domain or find another way to reopen this bike/ped path. we should be expanding the bike/ped network, not reducing it. Jan 31, 2026, 01:50 PM	The comment above mine contains only one word: "dangerous." Unfortunately it seems this person is missing the point, here. This is a "biking challenge," where the key word is "challenge." The fact that this is a dangerous area for bikers is irrelevant: in order to address this biking challenge one must have a winner's mindset. Challenges in life are called "challenges" not b/c they are easy, but because they are hard; and when we overcome these challenges, we come out the other side as better people.	Biking Challenge	1

Jan 31, 2026, 04:40 PM	this is a surprisingly busy intersection	Driving Challenge	1
Feb 04, 2026, 01:07 AM	The reason this is so busy is because San Antonio is a nightmare!!! People resort to side streets. There are so many new apartments and several schools and its one of the access points to 101. Really stupid planning! The muckedy mucks that decide where to put housing don't live on this side of town, that's for sure.	Driving Challenge	0

Feb 02, 2026, 11:33 PM	This on-ramp is ridiculously short and causes lots of dangerous merges when there are other drivers coming off at the same time. The next on-ramp is so close, please close this on-ramp and make it off-ramp only.	Driving Challenge	2
Feb 14, 2026, 01:59 AM	I agree with the other commenter that the on-ramp is way too short when you have to turn right off of N Rengstorff at ~20 mph and then need to accelerate immediately to 60 mph	Driving Challenge	1
Feb 14, 2026, 10:36 PM	Yes this Rengstorff onramp feels extremely dangerous and too short to read merges in order to safely speed up or slow down in time. Agree it should be an offramp only. Could move the onramp elsewhere.	Driving Challenge	0
Feb 01, 2026, 01:40 AM	It's extremely dangerous here during morning commute when people exiting this off ramp tries to get over 3 lanes to turn left onto charleston rd. this should not be allowed.	Driving Challenge	1

2/21/2026 10:10	I live on or near Rengstorff Avenue	I walk, I drive	Every day	I don't park along Rengstorff Avenue	Other (please specify) : None of the above. It's pretty good as-is.	Improved sidewalks	Better street lighting	Improvements for people with disabilities	Headed northeast at the Central Ave intersection, the continuing lanes shift to the right just before the tracks. People in the right lane often ignore this and end up going straight into the left lane, cutting other drivers off. I have seen and been involved in near accidents there.	The hidden bike lanes on California St are a horrible idea and need to be rearranged before someone is injured or dies. Cars cannot see the bikes when turning. There are plenty of alternatives to this absurd layout.	94040	55-64	White or Caucasian	English

2/17/2026 23:52	I live on or near Rengstorff Avenue, Other (please specify) : I used to bike commute on Rengstorff for 18 years.	I bike or scooter, I drive	Every day	I don't park along Rengstorff Avenue	Traffic congestion, Other (please specify) : The traffic light timing sucks. It gives very little time for heavy traffic eastbound on central expressway. And when the train comes, the cycle is interrupted, and more time should be given to cars crossing the tracks after the train clears. Also, too many drivers aren't paying attention, and don't react when the car in front moves. Then the light cycle ends prematurely because no traffic is going through. Give those idiots tickets.				Make the road go under the tracks.	I don't think it's unsafe, except for biking over 101. But with the bike bridge, I can avoid it.	94043	55-64	White or Caucasian	English

It should either be more efficient by closing off access (no unprotected left turns) or putting it on a road diet to slow things down. Either works, but not choosing one makes it bad for both kinds of users.	The QR code on the mailer doesn't work.	94043	25-34	White or Caucasian	English

I drive, Other (please specify) : Our bicycles will be in danger with the pilot program. Parked and moving cars can see them now on a very wide bike path. With pilot program the car trying to park will hit them	Every day	To park at home, Other (please specify) : We alot of parking available on rengstorff and have never had a problem.	Speeding drivers, Other (please specify) : We only have normal work congestion for 30 minutes. Traffic flows smoothly due our traffic lights. We have no problem				Rengstorff is functioning perfectly with excellent crosswalk, etc everything mentioned above we have no problems	We do not want nor need the pilot program. That program puts all of us in danger. We need 4 lanes available, not 2. No one living on rengstorff wants to change anything on our street.	94043	65 or over	White or Caucasian	English

Sidewalks are too narrow making walking unpleasant. Too much space for cars vs other modes and encourages cars to go too fast.	94043	35-44	Prefer not to say	English, Mandarin

However, often in the late evening I hear what sounds like racing cars. It seems they are trying to see how loud they can get their engine. Most annoying. And probably dangerous if others are out at that time.	94043	65 or over	White or Caucasian	English
2/15/2026 15:04	I shop, eat, go to medical appointments, or visit entertainment destinations on or near Rengstorff Avenue	I drive	A few times a month	I don't park along Rengstorff Avenue	Traffic congestion, Drivers blocking crosswalks	New or safer crossings at intersections for pedestrians and cyclists	More greenery and landscaping	Slow drivers down	The issue with Rengstorff is all based at the train track crossing. Very poorly designed - partly poor timing by Caltrain and partly the road design. The cars back up to California St. The light at the community center takes way too long to turn green when trying to turn left on Rengstorff.	The train track crossing is the reason Rengstorff is a mess. Lights are too long which creates backup. Yes better bike lanes are welcome. I am a cyclist. It is more the flow of traffic the city needs to address. Too many long lights and not movement. I would bike on the sidewalks to be safe.	94041	55-64	White or Caucasian	English

To remove one lane for parking and bikers. You have more vehicles than bicycles!!	Better street lighting	New or safer crossings at intersections for pedestrians and cyclists	New midblock crossings	I think you should provide a day use lane for bicyclists and at night for cars, just like the freeway commuter lanes. To remove one lane permanently and its very confusing is horrible on such a busy street.	Do better	94043	65 or over	Prefer not to say	English

I avoid it during commute hours due to trains delays.				All of the issues are cosmetic. I would rather see us save the money and start planning for an underpass under the train tracks. San Mateo County was able to upgrade most of their congested street/train intersections. Why can't we?	I know biking coalition is strong in area. But we don't have population like New York and Berlin to justify these bike lanes. 80% of my neighbors hate them. They have taken parking away from apt dwellers on CA, small business owners. 1/30/2026 13:55	I live on or near Rengstorff Avenue	I drive	Once a week or more	I don't park along Rengstorff Avenue	Traffic congestion, Other (please specify) : Rengstorff/Central is a nightmare. People often don't understand where to stop with two lights so close to each other and 2 left turn lanes in between to go Northbound on Central from south of the tracks on Rengstorff. Also the turn onto Rengstorff from Crisanto is also congested and a huge mess. It's too close to Central and it's hard for drivers to turn onto Rengstorff. Maybe they need a dedicated turn lane? Don't take away street parking like was done to California. It is so unfair to people on California who have lost sometimes 5-6 spots per block. Housing is too congested in this area to remove their parking.
