to M Zhou

If I read this correctly this is a plan to ELIMINATE minimum parking requirements for residential uses. Why? To make our streets more crowded? In order to give bigger profits to developers? where is your vision for the future of the people of Mountain View?
There better be some d...good reasons to even consider this.

Commission members, council members, and staff

YES! Eliminating parking minimums is an absolutely monumental step towards meeting our upcoming housing and climate change goals. Many, many thanks to all those involved in updating these zoning codes.

I strongly believe that parking minimums near public transit is an absolute blocker for building new housing and getting bike/ped infrastructure and getting people to actually utilize the public transit. Why would I utilize public transit if I have to walk through miles of parking lot just to get to the station?

I appreciate all you do and I hope for a strong recommendation from EPC to move this forward. And I hope that the council approves this as well in November.

Emil Abraham

Questions about "Update on Parking Requirements"

From Kristian Lyngbae [REDACTED]

Hi Hang,

I just received an email about the updates on parking requirements. I didn't see any links to the price plans that were referenced so I wanted to understand if this would potentially affect parking minimums for single family homes in the Monta Loma neighborhood of Mountain View.

Thank you!
- Kristian Lyngbaek

Hello,

I left a voicemail asking for a return call, regarding the emailed notice of hearing regarding Code and Precise Plan Amendments Regarding Minimum Parking Requirements - Housing Element subtasks a and b of Program 1.2.

I would appreciate a call back today, if at all possible.

Thank you.

Regards,

Mac
