Project Overview and Introduction

WTA Middlefield LLC is planning a new mixed-use development at 490 East Middlefield Road in Mountain View, California. I was asked to provide a Consulting Arborist Report for the project site for submission to the City of Mountain View, January 2025. I visited the site on January 11, 2025; to review all the existing trees on site, this also includes the City Sidewalk trees on Ellis Street. I used the Topographic Survey provided by Kier + Wright dated November 2024 – JOB NO. A18155-1, using Sheets: C1.0, C1, C2, and C3. All Four Sheets show the location of the trees on site.

Description of Trees

The purpose of my site visit is to evaluate the species, size, location, health, and recommendations. I reviewed a total of 112 trees on the property – (28) Bradford Pears (*Pyrus calleryana*), (24) Crapemyrtle (*Lagerstromia indica*), (15) Pacific madrone (*Arbutus menziesii*), (12) Redwood Trees (*Sequoia sempervirens*), (7) Ash Species (*Fraxinus* species), (6) Sycamore trees (*Platanus* species), (6) Pistache trees (*Pistacia chinensis*), (4) Deodar cedar (*Cedrus deodara*), (3) Saucer magnolia (*Magnolia soulangeana*), (1) Coast Live Oaks (*Quercus agrifolia*), (1) Liquidambar (*Liquidambar styraciflua*), (5) Tulip Trees. The majority of trees appeared to be in poor to fair condition at the existing property.

Table 1: Tree Condition Summary

Species (Common Name)	Condition				Total Count	Remove
	Critical (20%)	Poor (40%)	Fair (60%)	Good (80%)		
Bradford Pear	10	18	0	0	28	28
Crapemyrtle	0	0	24	0	24	24
Pacific Madrone	0	0	15	0	15	15
<i>Coast Redwood</i>	0	4	8	0	12	11
Ash	0	7	0	0	7	7
Sycamore	0	2	4	0	6	6
Chinese Pistache	0	6	0	0	6	6
<i>Deodar Cedar</i>	0	2	2	0	4	4
Saucer Magnolia	0	0	3	0	3	3
<i>Coast Live Oak</i>	0	0	0	1	1	1
Liquidambar	0	1	0	0	1	1
Tulip Tree	0	1	4	0	5	1
Total	10	41	60	1	112	107

All of the trees on site were planted when the site of the existing building was completed. There are (12) Redwood trees, (4) Deodar Cedar, (2) Pacific Madrone, (1) Tulip, (4) Bradford Pear), and (1) Coast Live oak (5) Ash trees, and one (1) Liquidambar that have matured into a Mountain View Heritage trees

The Redwood trees were planted in groups of (3) trees at three corners of the property and next to the building are all competing in a very confined growing space. Redwood trees as they mature will need very large spaces for their canopies to mature and roots to develop to keep the trees healthy. The trees are very young and are in good health, but rated poor due to the location they were planted in. Tree Tags 1368, 1369, and 1370 are growing very close to the building, loading dock and garbage enclosure. The three remaining groupings are at the corners and tree tags 1355, 1344, 1379, 1380, and 1381 are all planted under or next to the PG&E High Voltage Lines. Four of the redwood trees are topped 30 feet below the lines and tree tags 1335 and 1381 have had the upper canopy pruned back from the lines. Long term all these trees will eventually have to be removed as they continue to be topped or heavily pruned. The Bradford Pear trees that are planted under the Power Lines are also being topped each year to keep the power lines safe.

The (19) Bradford Pear trees and the (4) Redwood that are planted between you and the neighboring property are growing under the high voltage PG&E lines. Every year PG&E prunes these trees to keep them a safe distance from the power lines. This practice of topping is the only way to keep the central leaders from encroaching on the lines. As a result of this pruning, the Bradford pears and redwoods are slowly declining due to sun scorch and risks of disease. The Bradford Pears are also competing with the neighboring trees that have resulted in half canopies. The redwood trees are showing signs of decay in the upper canopy due to the aggressive pruning each year. I do recommend removing these trees and installing a more suitable tree or shrub that will grow no taller than 20 feet.

The (4) Protected Cedar trees are all planted along the sidewalk. Like the Redwood Trees these are large growing conifer trees that do well in urban settings but eventually will outgrow their planting space. Tree Tag 1309 is a cedar where the trunk leans over the sidewalk at 45-degree angle and is recommended for removal before the tree fails. The remaining trees are planted along the perimeter and around the building.

There are (3) Raywood Ash – Tree Tags 1389, 1390, and 1391 that are planted in the walkway in very confined planting circles. These trees are in poor health with sun scalds and severe fire blight. The (4) along Middlefield Road are also ash trees with severe fire blight. These (7) ash trees have been pruned severely to keep removing the dead limbs from the fire blight. The canopies all have dead limbs and are declining, due to the location of these trees near walkways and the busy road I do recommend removing these trees for safety to people and property.

Definition of Protected Trees In Mountain View

The City of Mountain View Code of Ordinances, Chapter 32, Article II, Protection of the Urban Forest defines Heritage Trees as:

- Any Oak, Redwood or Cedar tree that has a trunk circumference of 12" or more when measured at 54" above natural grade; or
- Any tree that has a trunk circumference of 48" or more measured 54" from the ground; or
- A multi-branched tree that has major branches below 54" above the natural grade with a circumference of 48" measured just below the first major trunk fork; or
- A grove of trees designated as "heritage" by the City Council.
- **In an effort to manage the urban tree canopy in Mountain View, certain trees require permits to remove. Heritage trees require a 2:1 replacement ratio and non-heritage trees greater than 4" diameter require replacement at a 1:1 ratio.**

Additional Requirements:

TREE REMOVAL SITUATION	URBAN FORESTRY	PLANNING
Removing a dead or fallen Heritage tree or Street tree on any property	X	
Removing a Street tree in front of any property (without other construction activity proposed)	X	
Removing any number of Heritage tree(s) or Street tree(s) at a single family home or duplex property (with or without other construction activity proposed) <i>Note: A tree removal permit related to construction activity will be reviewed in tandem with a submitted building permit to the City.</i>	X	
Removing a Heritage tree(s) as part of a development permit on a nonresidential site or a multifamily residential site (with or without a Homeowners Association).		X
Removing 3 or fewer Heritage trees on any multifamily residential or nonresidential property where no other construction activity is proposed	X	
Removing 4 or more Heritage trees on any multifamily residential or nonresidential property (with or without other construction activity proposed)		X
Removing a tree(s) that does not qualify as a Heritage tree or Street tree on any multifamily residential or nonresidential property		Contact Planning
Removing a tree on a single-family or duplex property that is not a Heritage tree or Street tree		No permit is required.

By this definition, a total of 31 Heritage trees were identified on this property and city designated zones. These are listed in the report exhibits.

Assessment Methods

Three trees were evaluated on January 11, 2025. The assessment procedure consisted of each tree of any size assessed visually from the ground and evaluated as follows:

1. Identifying the tree as to species.
2. Identifying each tree with a numerical GPS plotted number
3. Measuring the trunk diameter at a point 54" above grade.
4. Evaluate Health and Safety

Evaluating the health and structural condition using a scale of 0 - 100%:

100 - A healthy, vigorous tree, reasonably free of signs and symptoms of disease, with good structure and form typical of the species.

80% - Tree with slight decline in vigor, small amount of twig dieback, or minor structural defects that could be corrected.

60% - Tree with moderate vigor, moderate twig and small branch dieback, thinning of crown, poor leaf color, moderate structural defects that might be mitigated with regular care.

40% - Tree in decline, epicormic growth, extensive dieback of medium to large branches, significant structural defects that cannot be abated.

20% - Tree in severe decline, dieback of scaffold branches and/or trunk; most of foliage from epicormic shoots (secondary shoots that arise along the trunk and branches); extensive structural defects that cannot be abated.

0 - Tree is dead.

Table 2. Tree Species and Health Rating

Please reference Exhibit 1: Maps that show the general location of each tree and a picture of each tree with diameter (dbh), size and health.

Please review the health rating below and Objective.

Table 2. Tree Inventory and Health

Note: Trees are measured using the DBH method – circumference, measured at 4.3 above the ground.

1413	Saucer Magnolia	Project Removal	16'-30'	28.3	60% - Fair	NO
1414	Saucer Magnolia	Project Removal	16'-30'	34.5	60% - Fair	NO
1415	Ash Species	Project Removal	31'-45'	75.0	40% - Poor	YES

The health and structure of the trees were assessed visually from ground level. No drilling, root excavation, or ariel inspections were performed. Internal or non-detectable defects may exist and could lead to part of whole tree failures. Due to the dynamic nature of trees and their environment, it is not possible for Arborists to guarantee that trees will not fail in the future.

If any trees remain you will need to follow the outlined tree protection guidelines below. The preservation of these trees will follow the tree protection guidelines outlined below.

New Trees:

Species (Common Name)	Size	Count
Strawberry Tree	48" Box	9
Ray Hartman Wild Lilac	48" Box	16
Western Redbud	48" Box	72
Davis Gold Toyon	24" Box	32
Eddie's WW Dogwood	48" Box	2
Engelmann Oak	60" Box	5
Island Oak	60" Box	5
Compton Oak	60" Box	7
Silver Linden	60" Box	2
Maidenhair Tree	60" Box	14
Pink Dawn Chitalpa	48" Box	9
Total		173

Recommended Tree Protection Guidelines:

All contractors including demolition, grading, and underground contractors, sub-contractors, construction superintendent and other pertinent personnel should be required to review these guidelines with the Project Arborist (PA) prior to beginning work on site. The Tree Protection Zone (TPZ) identifies will be installed 2' outside of the drip-line in a half circle on all sides of the proposed home - by installing 4' high orange protective fencing around the entire drip-line of the tree and roots from disturbance.

The installation will be installed by the Project Arborist (Bob Peralta) and any work within the erected TPZ will need permission from the PA before being moved.

The following signs will be posted on 8.5x11 inches and installed on all the fences - the sign will read:

This is a Tree Protection Zone

Movement of this fence requires the prior authorization of the Project Arborist & Owner

(List Contact Information)

Activities prohibited within the TPZ include:

- *Storage or parking vehicles, building materials, refuse, excavated spoils, or dumping of paint or poisonous materials on or around trees and roots.*
Poisonous materials include, but are not limited to, paint, petroleum products, concrete or stucco mix dirty water or any other material which may be deleterious to tree health.
- *The use of tree trunks as winch support, anchorage, as a temporary power pole, signpost or any other similar function.*
- *Cutting of roots by utility trenching, foundation digging, placement of curbs, trenches and other miscellaneous excavation without prior approval of the PA.*
- *Soil disturbance or grade/drainage changes.*
- *Materials must not be stored, stockpiled, dumped, even temporarily, inside the TPZ of Heritage trees.*

Activities permitted within the TPZ include or recommended by the PA.

- *Irrigation, aeration, or other beneficial practices that have been specifically approved for use within the TPZ.*
- *Mulch if needed and or fertilization as recommended by monthly site visits by the PA.*
- *Each site visit will require a report recommending any tree healthcare supplements, recommended watering as needed during peak summer months and reduction into Fall and Winter.*

Please give me a call if you have any questions.

Sincerely,

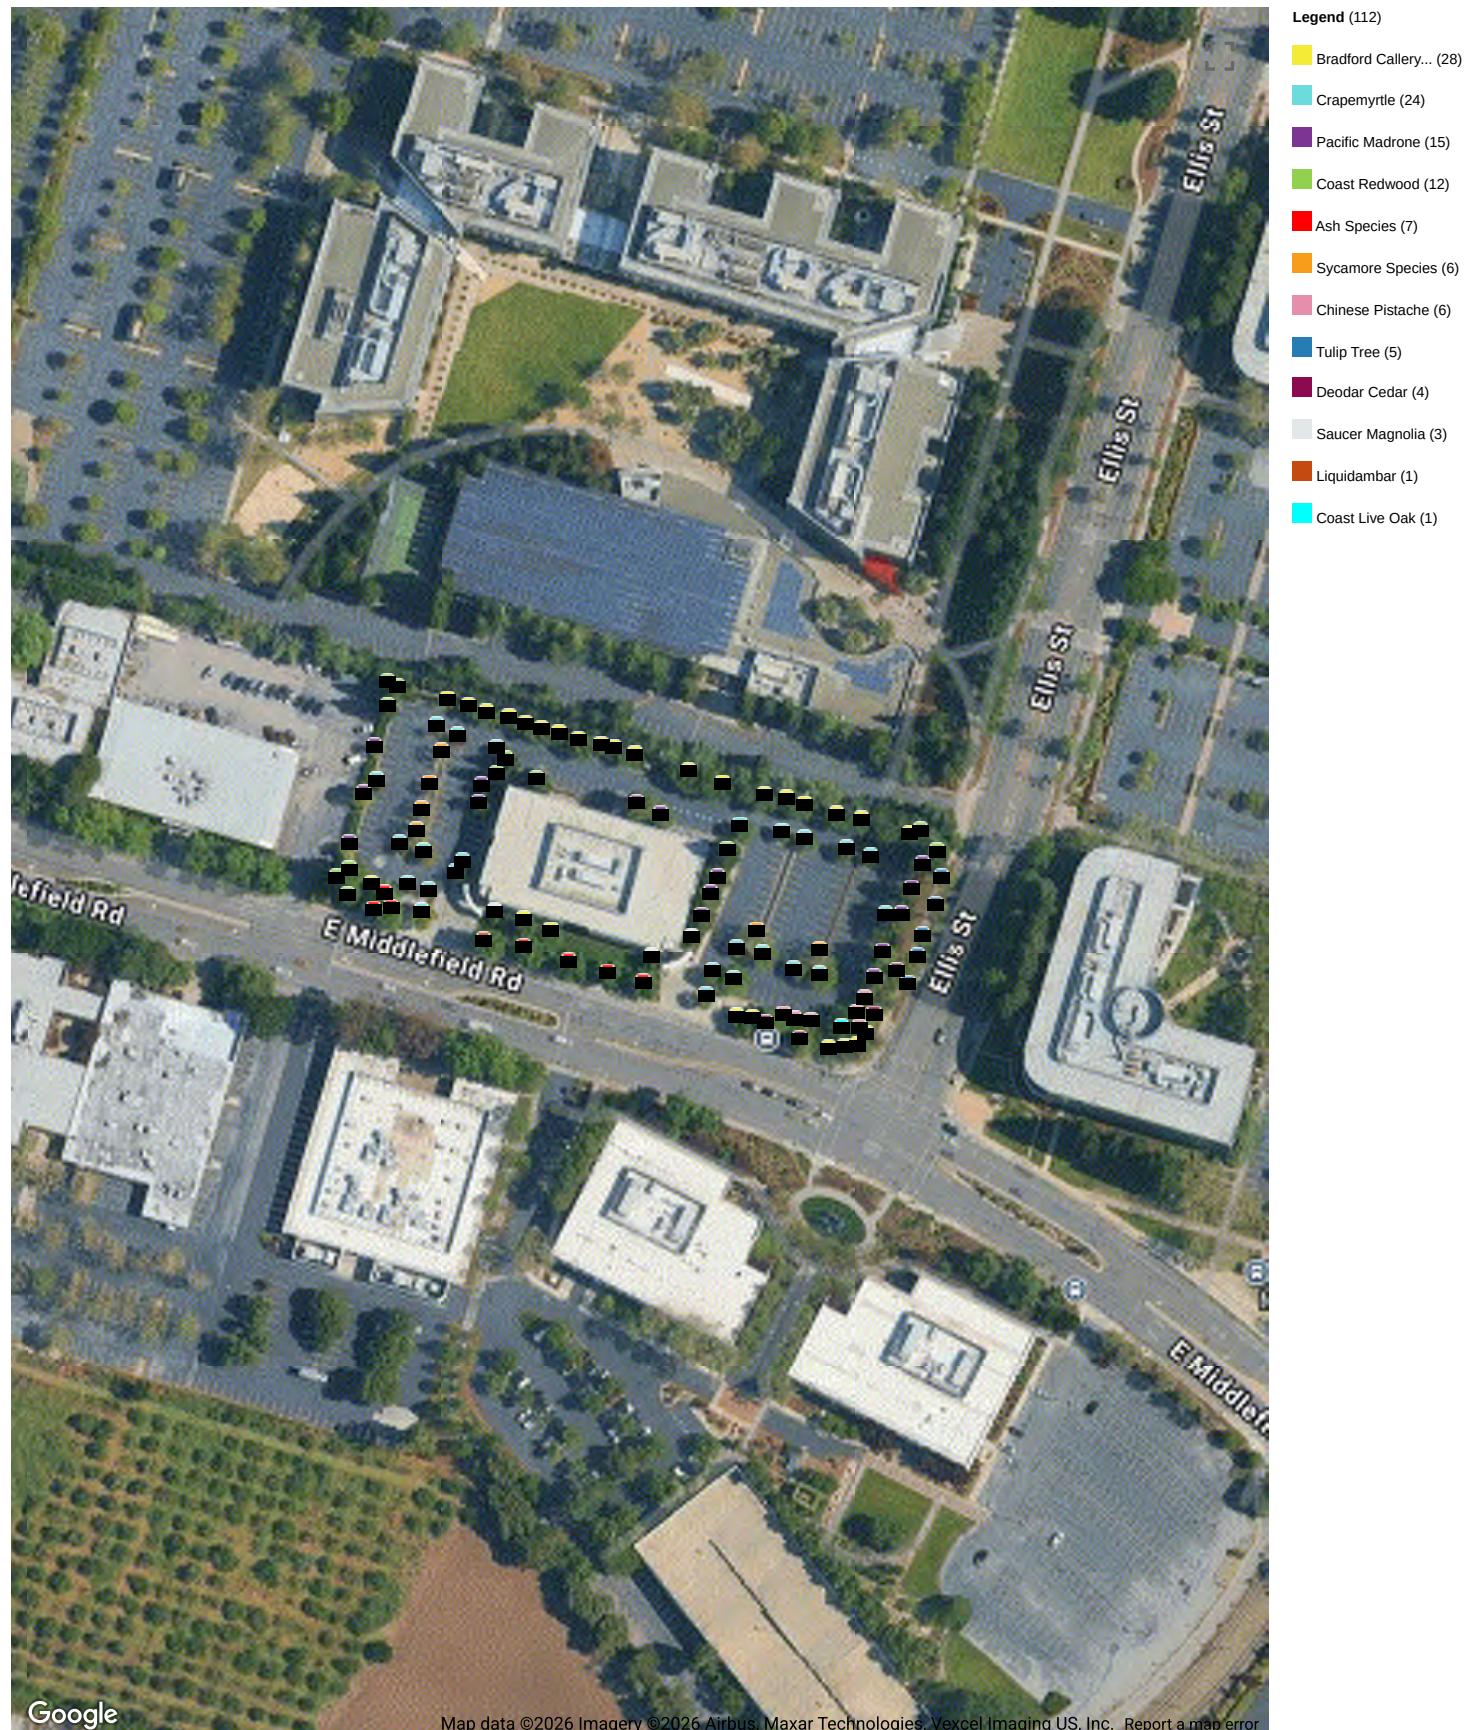

Bob Peralta
